

YSL-891Z Trombone

The YSL-891Z gives discerning trombone players an instrument with a clear resonant tone and the flexibility to cover a wide range of styles and tonal colors. It features a .508" bore, a new counterweight design and two interchangeable leadpipes. The NY leadpipe is longer and more free-blowing for a wide range of live performance needs, while the LA leadpipe is shorter and easier to control for studio applications.

YSL-882OR Trombone

The YSL-882OR Xeno trombone is boutique-quality at an affordable price. The fixed leadpipe, .547" bore design is based on the successful YSL-882O and GO Xeno models. The YSL-882OR features a wider hand slide, a reversed tuning slide and a new "Balanced Response" rotor system.
