Flash memory is built into the instrument itself, letting you store the song data you've downloaded from the Internet. The stored songs are always available for immediate loading and playback, since the data remains in the instrument even when the power is turned off.

USB Connection

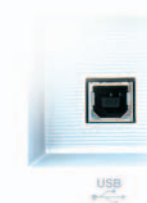

There are two different types of USB terminal.

USB TO HOST

Connect a computer to the USB TO HOST terminal for data transfer and MIDI recording between the instrument and the computer.

USB TO DEVICE

Connect a USB storage device to this terminal for saving and loading your important data.

Compatible Models:
Tyros3, PSR-S910, PSR-S710

World of music direct to you

Our Internet Direct Connection (IDC) service links your Yamaha keyboard directly to the Internet.

Listening

If you have a Yamaha keyboard, you'll be interested to know it can make great music all by itself—even when you're not playing it. Simply connect it to the Internet via IDC—and tap directly into a huge library of music.

Over **10,000** songs available.

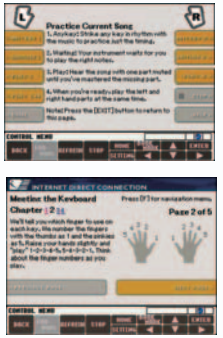

Playing

There's nothing more fulfilling than being able to sit down at an instrument and play your favorite music. With a Yamaha keyboard and IDC, you and your entire family can get in on the fun. It's as easy as A-B-C! No matter what your level of experience, IDC lets you find the songs you love, and helps you play them the way you want!

Learning

Learning something new—especially a musical instrument—can be intimidating. Not so with IDC. This unique online service lets you download music that you're familiar with, and makes it exceptionally easy to learn that music—with the convenient Lesson features built into your Yamaha keyboard. Even if you've never played a note in your life, the inspiring sounds and interactive functions will have you playing in no time!

Welcome to the world of automatic accompaniment!
