

# PJP-EC200

Conference Echo Celler

*ProjectPhone*

User's Manual

## Caution: Read This before Operating Your Unit.

- 1 To assure the finest performance, please read this manual carefully. Keep it in a safe place for future reference.
- 2 Only voltage specified on this unit must be used. Using this unit with a higher voltage than specified is dangerous and may cause fire, damage to this unit, and/or personal injury. Yamaha will not be held responsible for any damage resulting from use of this unit with a voltage other than specified.
- 3 When using the unit with an AC adapter, be sure to use the dedicated adapter (PJP-PS02). Using other AC adapter may cause an electrical shock, fire, and/or damage to this unit.
- 4 When using the unit for a long time, the unit may become warm. Disconnect the cables, then leave the unit alone for cooling.
- 5 When not planning to use this unit for long periods of time (i.e. vacation), disconnect the AC power plug from the wall outlet.
- 6 Do not plug in this unit to a wall outlet until all connections are complete.
- 7 To prevent damage by lightning, keep the cables disconnected during a lightning storm.
- 8 Do not use force on the power cable to prevent a fire, electrical shock, damage to this unit, short circuit, and/or disconnection.
- 9 When disconnecting the power cable from the wall outlet, grasp the plug; do not pull the cable.
- 10 Install this unit near the wall outlet and where the AC plugs can be reached easily.
- 11 Do not cover this unit with a newspaper, tablecloth, curtain, etc. in order not to obstruct heat radiation. If the temperature inside this unit rises, it may cause fire, damage to this unit, and/or personal injury.
- 12 Do not install this product upside down or in upright position. Install the product on a stable, flat surface by orienting it horizontally.
- 13 Do not install this product near television sets and/or wireless devices to prevent operation failure caused by electromagnetic waves and/or magnetism.
- 14 Locate this unit away from other electrical appliances, motors, or transformers to avoid humming sounds.
- 15 Avoid installing this unit where foreign object may fall onto this unit and/or this unit may be exposed to liquid dripping or splashing. On the top of this unit, do not place:
  - Other components, as they may cause damage and/or discoloration on the surface of this unit.
  - Burning objects (i.e. candles), as they may cause fire, damage to this unit, and/or personal injury.
  - Containers with liquid in them, as they may fall and liquid may cause electrical shock to the user and/or damage to this unit.
- 16 Do not expose this unit to sudden temperature changes from cold to hot, and do not locate this unit in an environment with high humidity (i.e. a room with a humidifier) to prevent condensation inside this unit, which may cause an electrical shock, fire, damage to this unit, and/or personal injury.
- 17 Do not attempt to modify or fix this unit. Contact qualified Yamaha service personnel when any service is needed.
- 18 Do not use force on switches, knobs, and/or cords.
- 19 Do not clean this unit with chemical solvents; this might damage the finish. Use a clean, dry cloth.
- 20 Do not use this unit near persons with a heart pacemaker implant or defibrillator implant.
- 21 When disposing this unit, comply with your local regulations. This unit contains a coin-type lithium battery.
- 22 If the coin-type lithium battery is dead, contact your nearest authorized Yamaha dealer or service center.

This unit is not disconnected from the AC power source as long as it is connected to the AC wall outlet, even if this unit itself is turned off. This state is called the standby mode. In this state, this unit is designed to consume a very small quantity of power.

### **WARNING**

**TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK,  
DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE.**

# Introduction

Thank you for purchasing Yamaha PJP-EC200.

Before operating this unit, please read this manual carefully.

For your safety, please read all safety instructions and precautions stated in this manual carefully and keep it in a safe place for future reference.

## ***Check the latest information***

This manual has been compiled based on the latest version of the firmware as of January 2010. For the latest information about this unit, please visit the following website.

### ■Projectphone website

<http://www.yamaha.co.jp/english/product/projectphone/>

For the updating procedure, refer to “Using the Latest Features” (page 47) in this manual.

## ***About this manual***

### ■About abbreviations

In this manual, the product names are described as follows.

- Yamaha PJP-EC200: this unit
- Yamaha Projectphone: PJP
- Microsoft® Windows®: Windows

### ■About detailed technical information

Detailed knowledge on the professional audio (PA) system, Internet and network may be required to utilize this unit at its full performance. As the provided manual does not give detailed technical information, please also refer to commercially available books as required.

### ■About trademarks

- Ethernet is a registered trademark of Xerox Corporation.
- Microsoft and Windows are registered trademarks of Microsoft Corporation in the United States and other countries.

- |   |

| <ul style="list-style-type: none"><li>• No part of this document may be copied or used in any form without permission of Yamaha.</li><li>• Specifications of this unit or the web menu and contents of this document are subject to change without notice.</li><li>• Yamaha does not accept any liability for any loss or damage resulting from any use of this unit. The warranty covers a repair of this unit only.</li></ul> |
|---|

# CONFIRMATION SOFTWARE LICENSE AGREEMENT

BY USING THE "SOFTWARE", YOU ARE DEEMED TO AGREE TO BE BOUND BY THE TERMS AND CONDITIONS OF THIS AGREEMENT.

## SOFTWARE LICENSE AGREEMENT

This License Agreement (the "AGREEMENT") is a legal agreement between you and Yamaha Corporation ("YAMAHA") under which YAMAHA is providing the firmware of YAMAHA's Projectphone™ (the "PRODUCT") and related software program, documentation and electronic files (collectively, the "SOFTWARE").

This AGREEMENT applies to the SOFTWARE which YAMAHA provides you and the installed copy thereof, subject to the provision of 1-1 herein, into the PRODUCT or personal computer owned by you.

### 1. GRANT OF LICENSE:

- 1-1. YAMAHA grants you a personal non-exclusive license to install the SOFTWARE and use the SOFTWARE on the PRODUCT or other devices, including but not limited to the personal computer, which you own.
- 1-2. You shall not assign, sublicense, sell, rent, lease, loan, convey or otherwise transfer to any third party, upload to a web site or a server computer to which specified or unspecified persons may access, or copy, duplicate, translate or convert to another programming language the SOFTWARE except as expressly provided herein. You shall not alter, modify, disassemble, decompile or otherwise reverse engineer the SOFTWARE and you also shall not have any third party to do so.
- 1-3. You shall not modify, remove or delete a copyright notice of YAMAHA contained in the SOFTWARE.
- 1-4. Except as expressly provided herein, no license or right, express or implied, is hereby conveyed or granted by YAMAHA to you for any intellectual property of YAMAHA.

### 2. OWNERSHIP AND COPYRIGHT:

The SOFTWARE is protected under the copyright laws and owned by YAMAHA. You agree and acknowledge that YAMAHA transfers neither ownership interest nor intellectual property in the SOFTWARE to you under this AGREEMENT or otherwise.

### 3. EXPORT RESTRICTIONS:

You agree to comply with all applicable export control laws and regulations of the country involved, and not to export or re-export, directly or indirectly, the SOFTWARE in violation of any such laws and regulations.

### 4. SUPPORT AND UPDATE:

YAMAHA, YAMAHA's subsidiaries and affiliates, their distributors and dealers are not responsible for maintaining or helping you to use the SOFTWARE. No updates, bug-fixes or support will be made available to you for the SOFTWARE.

### 5. DISCLAIMER OF WARRANTY:

- 5-1. THE SOFTWARE IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
- 5-2. IN NO EVENT SHALL YAMAHA, YAMAHA'S SUBSIDIARIES AND AFFILIATES, THEIR DISTRIBUTORS AND DEALERS BE LIABLE FOR ANY DAMAGES WHATSOEVER (INCLUDING WITHOUT LIMITATION, LOSS OF BUSINESS PROFITS, LOSS OF BUSINESS INFORMATION, LOSS OF BUSINESS INTERRUPTION OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES) ARISING OUT OF THE SOFTWARE, USE THEREOF, OR INABILITY TO USE THEREOF EVEN IF YAMAHA, YAMAHA'S SUBSIDIARIES AND AFFILIATES, THEIR DISTRIBUTORS OR DEALERS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME STATES DO NOT ALLOW THE LIMITATION OR EXCLUSION OF LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.
- 5-3. YAMAHA, YAMAHA'S SUBSIDIARIES AND AFFILIATES, THEIR DISTRIBUTORS AND DEALERS SHALL HAVE NO OBLIGATION TO INDEMNIFY YOU AGAINST ANY CLAIM OR SUIT BROUGHT BY A THIRD PARTY ALLEGING THAT THE SOFTWARE OR USE THEREOF INFRINGES ANY INTELLECTUAL PROPERTY OF SUCH THIRD PARTY.

**6. TERM:**

- 6-1. This AGREEMENT becomes effective upon your agreeing the terms and conditions herein and continues in effect unless or until terminated in accordance with the provision of 6-2 or 6-3 herein.
- 6-2. You may terminate this AGREEMENT by deleting the SOFTWARE installed into the PRODUCT.
- 6-3. This AGREEMENT will also terminate if you fail to comply with any of the terms and conditions of this AGREEMENT.
- 6-4. In case this AGREEMENT is terminated in accordance with the provision 6-3, you shall promptly delete the SOFTWARE.
- 6-5. Notwithstanding anything contains herein, Sections 2 though 6 shall survive any termination or expiration hereof.

**7. SEVERABILITY:**

In the event that any provision of this AGREEMENT is declared or found to be illegal by any court or tribunal of competent jurisdiction, such provision shall be null and void with respect to the jurisdiction of that court or tribunal and all the remaining provisions of this AGREEMENT shall remain in full force and effect.

**8. U.S. GOVERNMENT RESTRICTED RIGHTS NOTICE:**

The Software is a "commercial item," as that term is defined at 48 C.F.R. 2.101 (Oct 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users shall acquire the Software with only those rights set forth herein.

**9. ACKNOWLEDGMENT:**

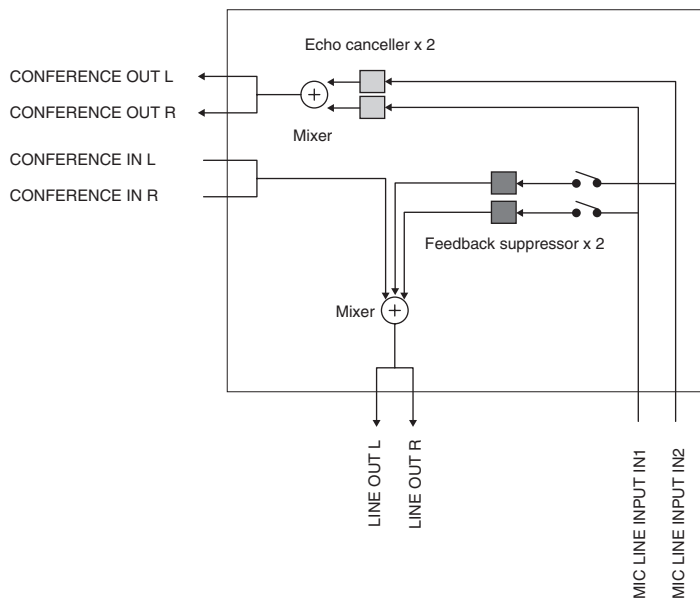

You agree that this AGREEMENT is the complete and exclusive statement of agreement between you and YAMAHA concerning the subject matter hereof and supersedes all proposals or prior agreements, verbal or written, and any other communications between you and the parties relating to the subject matter hereof. NO amendment to this AGREEMENT shall be effective unless signed by a duly authorized representative of YAMAHA.

**10. GOVERNING LAW:**

This AGREEMENT shall be governed by and construed in accordance with the laws of Japan without reference to the principles of conflict of laws.

# About the Product

The PJP-EC200 is a high-performance echo canceller box that enables smooth simultaneous talk during a videoconference or a webconference.

## Enhanced basic functions

### ■ Echo canceller

Echo is a phenomenon that occurs when microphones pick up the audio reproduced from the speakers. The echo canceller of this unit eliminates echo elements from sounds picked up by the microphones to enable smooth simultaneous talk.

### ■ Feedback suppressor

The feedback suppressor detects generation of acoustic feedback which occurs when a sound loop exists between speaker output and microphone input and applies the notch filter to minimize the acoustic feedback.

### ■ Auto analyzer

The auto analyzer optimizes this unit's audio settings to minimize the generation of echoes and acoustic feedback by automatically analyzing the characteristics of a microphone and speakers connected to this unit and the acoustic characteristics of your conference environment.

### ■ Noise reduction

The noise reduction automatically detects ambient noises (generated by a fan or an air conditioner) and removes the noises from sounds picked up by the microphones. By combining with the echo canceller, it effectively eliminates unwanted noises from the pickup sounds and delivers clear sounds to the other end. The noise reduction of this unit also works on the sounds from the other end.

### ■ Auto gain controller

If you are using a boundary microphone, the volume level of sounds picked up by the microphone varies depending on the distance between the talker and microphone. The auto gain controller automatically adjusts the pickup gain to optimize the volume level of pickup sounds and minimize the volume differences caused by the distance to a talker.

# Controls and Functions

## Front panel

### ① LEDs

Light to indicate the status of this unit.

### ② Label

The following information is shown.

- **MODEL No.:** Model number of this unit
- **SER.:** Serial number for use in management/distinction of this unit

## ■ Functions of the LEDs

### INPUT LEVEL (IN1/IN2 /CONFERENCE)

On (green): Detecting audio data.

On (red): Audio is distorted because the input level is too high.

Off: No audio data has been detected.

#### Note

If this LED lights up in red, adjust the input gain for MIC/LINE INPUT using the GAIN controls on the rear panel of this unit until it turns off.

### PHANTOM

On: The phantom power supply is on.

Off: The phantom power supply is off.

Blinks: The setting is not reflected.

If the setting is not reflected, refer to “Q1: LEDs are off or blinking” (page 51).

### GAIN KNOB

On: The MIC/LINE INPUT gain setting on this unit is working.

Off: The MIC/LINE INPUT gain setting on the web menu is working.

Blinks: The setting is not reflected.

If the setting is not reflected, refer to “Q1: LEDs are off or blinking” (page 51).

### DIP SW

On: The DIP switch settings are prioritized.

Off: The web menu settings are prioritized.

Blinks: The setting is not reflected.

If the setting is not reflected, refer to “Q1: LEDs are off or blinking” (page 51).

### POWER

On: The power of this unit is on.

Off: The power of this unit is off.

### ① AUTO ANALYZER

Press this switch to adjust the echo canceller and feedback suppressor automatically.

### ② INITIALIZE

If you turn on this unit while holding down this switch, you can reset the settings of this unit to the default. If you press this switch when the power is on, only the network settings are reset to the default. For details, refer to “Resetting the Settings of This Unit” (page 56).

### ③ LED (PHANTOM)

Lights to indicate the status of the phantom power.

- On: The phantom power is on.
- Off: The phantom power is off.
- Blinks: The setting is not reflected.

- If the setting is not reflected, refer to “Q1: LEDs are off or blinking” (page 51).
- This LED works in the same way as the PHANTOM LED on the front panel.

### ④ DIP switch

Changes the settings of this unit.

### ⑤ LED (DIP SW)

Lights to indicate the prioritized settings (DIP switch or web menu).

- On: The DIP switch settings are prioritized.
- Off: The web menu settings are prioritized.
- Blinks: The setting is not reflected.

- If the setting is not reflected, refer to “Q1: LEDs are off or blinking” (page 51).
- This LED works in the same way as the DIP SW LED on the front panel.

### ⑥ ETHER

Use to connect a LAN cable. The LINK LED (left) and the SPEED LED (right) are above the LAN port.

- **LINK LED:** Off (no link), On (linked), Blinks (during data transfer)
- **SPEED LED:** Off (10BASE-T), On (100BASE-TX)

### ⑦ LINE OUTPUT (L/R)

Use to connect speakers with built-in amplifier, or a PA system.

These jacks output monaural audio signals only.

### ⑧ CONFERENCE (IN/OUT)

Use to connect a PC or a videoconference system.

### ⑨ GAIN (IN1/IN2)

Adjust the input gain for MIC/LINE INPUT.

### ⑩ MIC/LINE INPUT (IN1/IN2)

Use to connect a microphone or a PA system. In addition, these jacks can be used as the XLR or PHONE jacks.

#### • XLR jack

Balanced input jack (1: Ground, 2: Hot, 3: Cold)

#### • PHONE jack

Monaural unbalanced input jack. (TS PHONE jack)

### ⑪ DC IN 12V

Use to connect the supplied AC adapter.

### ⑫ Power switch

Turns on or off this unit.

## ■ Functions of the DIP switch

### ① PHANTOM (DC+48V)

Turns on/off the phantom power.

**ON:** Turn on the phantom power.

**OFF:** Turns off the phantom power.

Make sure you set this switch to OFF when a device which does not require a phantom power is connected. Incorrect settings may cause a malfunction of the external devices.

#### Notes

- Set this switch to ON when an XLR-type microphone which requires a phantom power is connected to MIC/LINE INPUT.
- To protect the speakers, turn off the speakers or set the speaker volume to the minimum before turning on/off the phantom power.
- For your safety, the phantom power is not supplied unless it is enabled on the web menu even if this switch is set to ON.

While the phantom power is supplied, the PHANTOM LEDs on the front and rear panels turn on.

### ② IN1 & 2

Selects MIC or LINE according to the output level of devices connected to MIC/LINE INPUT.

**MIC:** Switch to the MIC level.

**LINE:** Switch to the LINE level.

#### Note

The signal level differs between MIC level and LINE level. When you connect a device to a MIC jack, set this switch to MIC. When you connect a device to a LINE jack, set this switch to LINE.

### ③ CONF.OUT

Selects MIC or LINE according to the input level of a device connected to CONFERENCE OUT.

**MIC:** Switch to the MIC level.

**LINE:** Switch to the LINE level.

#### Note

The signal level differs between MIC level and LINE level. When you connect a device to a MIC jack, set this switch to MIC. When you connect a device to a LINE jack, set this switch to LINE.

### ④ EC TYPE

Sets the effectiveness of the echo canceller.

**2:** Higher the echo reduction.

**1:** Lower the echo reduction to prioritize audio quality.

### ⑤ MIX & FS

Turns on/off the internal mixing and feedback suppressor.

**ON:** Output audio to LINE OUTPUT after audio input through CONFERENCE IN and MIC/LINE INPUT are mixed. Also, the feedback suppressor is enabled.

**OFF:** Output audio input through CONFERENCE IN to LINE OUTPUT. Also, the feedback suppressor is disabled.

### ⑥ DIP SW

Selects the setting priority (DIP switch or web menu).

Setting items that are not available by the DIP switch are always decided by the web menu.

**ETHER:** Prioritize the web menu settings.

**DIP SW:** Prioritize the DIP switch settings.

While the DIP switch settings are prioritized, the DIP SW LEDs on the front and rear panels turn on.

# Installation and Initial Setup

This section describes connections and setup required for using this unit. The basic setup of this unit is available only with the DIP switch. For advanced setup, refer to “Using the Web Menu” (page 16).

## Notes

- Do not use the mute function on a microphone or PA system connected to this unit to prevent echo generations on the other end.
- Make sure all devices are turned off before connecting a microphone or speakers. Moreover, make sure the microphone and speaker volumes of all devices are set to the minimum.
- To minimize echo or acoustic feedback, maintain an appropriate distance between the microphone and speakers.
- When connecting external devices, refer to the owner's manual supplied with each device in addition.
- Be sure to use the AC adapter and power cable supplied with this unit.

## Connecting a microphone and speakers directly

### 1 Connect a microphone to MIC LINE INPUT.

- You can use a XLR-type microphone or PHONE-type microphone.
- You can connect two microphones directly to this unit. If you use only one microphone, connect it to IN1.

### 2 Connect speakers with built-in amplifier to LINE OUTPUT.

### 3 Connect CONFERENCE IN of this unit to the audio output jack of your PC or videoconference system.

### 4 Connect CONFERENCE OUT of this unit to the audio input jack of your PC or videoconference system.

### 5 Connect the AC adapter to DC IN.

### 6 Connect the power cable to the AC adapter.

### 7 Connect the power cable to an AC outlet.

---

## **8 Configure the settings of this unit using the DIP switch.**

For details, refer to “Functions of the DIP switch” (page 10).

---

## **9 Turn on the external devices.**

---

## **10 Turn on this unit.**

The POWER LED on the front panel turns on.

---

## **11 On your PC or videoconference system, adjust the output level.**

Adjust the output level so that the INPUT LEVEL LED on the front panel does not turn on in red.

---

## **12 Use GAIN to adjust the input gain for MIC/LINE INPUT.**

Adjust the input gain so that the INPUT LEVEL LED on the front panel does not turn on in red.

---

## **13 Press AUTO ANALYZER.**

The echo canceller and feedback suppressor settings are automatically adjusted. For details, refer to “Automatic Setup by Auto Analyzer” (page 15).

### **Notes**

- If you do not connect a microphone to MIC/LINE INPUT IN2, set GAIN IN2 to the minimum.
- Set the microphone and speaker volumes to the minimum before turning off this unit.

## Using in combination with a PA system

By combining this unit with a PA system, it makes possible to use many microphones for a conference.

**1** Connect MIC/LINE INPUT IN1 of this unit to the audio output jack of your PA system.

**2** Connect microphones to your PA system.

**3** Connect speakers with built-in amplifier to LINE OUTPUT.

**4** Connect CONFERENCE IN of this unit to the audio output jack of your PC or videoconference system.

**5** Connect CONFERENCE OUT of this unit to the audio input jack of your PC or videoconference system.

**6** Connect the AC adapter to DC IN.

**7** Connect the power cable to the AC adapter.

**8** Connect the power cable to an AC outlet.

**9** Configure the settings of this unit using the DIP switch.

For details, refer to "Functions of the DIP switch" (page 10).

**10** Turn on the external devices.

**11** Turn on this unit.

The POWER LED on the front panel turns on.

**12** On your PC or videoconference system, adjust the output level.

Adjust the output level so that the INPUT LEVEL LED on the front panel does not turn on in red.

---

### **13 On your PA system, adjust the input gain.**

For details, refer to the owner's manual supplied with your PA system.

---

### **14 Use GAIN to adjust the input gain for MIC/LINE INPUT.**

Adjust the input gain so that the INPUT LEVEL LED on the front panel does not turn on in red.

---

### **15 Press AUTO ANALYZER.**

The echo canceller and feedback suppressor settings are automatically adjusted. For details, refer to "Automatic Setup by Auto Analyzer" (page 15).

#### **Notes**

- If you do not connect a microphone or a PA system to MIC/LINE INPUT IN2, set GAIN IN2 to the minimum.
- Set the microphone and speaker volumes to the minimum before turning off this unit.

# Automatic Setup by Auto Analyzer

The auto analyzer function automatically sets the echo canceller and feedback suppressor settings best suited for your environment (types of microphone and speakers, size of conference room, etc.).

## Note

The auto analyzer configures the settings based on the relative position of a microphone and speakers. It is effective when a fixed microphone such as a gooseneck microphone and a boundary microphone is used.

You can turn off the audio guidance which notifies you of events during the auto analyzer process. For details, refer to “Turning On/Off the Audio Guidance” (page 34).

## ■ Before starting the auto analyzer

To achieve the best results, carry out the following procedures before starting the auto analyzer.

- Install the microphone and speakers at places where they will be located during a conference.
- Adjust the speaker volume to an appropriate level for a conference.
- Adjust the input gain for MIC/LINE INPUT so that the INPUT LEVEL LED does not turn on in red.
- Set whether audio input through MIC/LINE is output to LINE OUT.

## 1 The auto analyzer starts.

By pressing AUTO ANALYZER, this unit outputs a long beep to indicate the start of the auto analyzer process and then plays back the audio guidance.

To quit the auto analyzer, press AUTO ANALYZE again.

## 2 Test tones are output.

This unit outputs test tones used for measuring your acoustic environment. Since this unit measures MIC/LINE INPUT IN 1 and IN2 individually, test tones are output twice. The INPUT LEVEL LEDs on the front panel blink during the measurement.

## Notes

- During the measurement, the microphone picks up test tones output from the speakers. To achieve the best results, keep the room as quiet as possible during the measurement.
- Since this unit measures MIC/LINE INPUT IN 1 and IN2 individually, this unit proceeds in the next step if any of measurements are successful. In case any measurement is failed, this unit will notify you of the status of the channel after the acoustic analysis.

## If a measurement is failed

The auto analyzer quits. This unit outputs short beeps to indicate an abnormal end and then plays back the audio guidance which explains the cause of the error.

## 3 The acoustic analysis starts.

This unit analyzes your acoustic environment and then optimizes the echo canceller and feedback suppressor settings automatically. The INPUT LEVEL LEDs on the front panel blink in a direction from right to left during the analysis.

The analysis time varies depending on your environment (types of microphone and speakers, size of conference room, etc.).

## 4 The auto analyzer ends.

This unit outputs a short beep to indicate a normal end or short beeps to indicate an abnormal end and then plays back the audio guidance which explains the result. Also, the front panel LEDs indicate the result of the auto analyzer.

## Note

If you move the microphone or speakers, the current settings optimized by the auto analyzer may lose effectiveness or increase the generation of echo or acoustic feedback. In this case, run the auto analyzer again.

## If you cannot feel the effectiveness

Run the auto analyzer again. If you are using this unit in an environment where echo or acoustic feedback is rarely generated, it may be difficult to feel the effectiveness. In this case, you do not need to run the auto analyzer again since your environment is already suited for a conference.

## If the auto analyzer abnormally ends

Follow the audio guidance or check the status of the front panel LEDs to change the installation location. For details on LED statuses, refer to “List of Error Messages” (page 55).

# Using the Web Menu

By using the web menu, you can configure this unit's settings in more detail. The web menu is accessible from the PC connected to this unit. To configure this unit's settings from the web menu, set the DIP switch (DIP SW) to ETHER.

## Notes

- If you set DIP SW to ETHER, the web menu settings are prioritized. The settings items you have configured using the DIP switch should be reconfigured on the web menu. If you set the DIP switch to DIP SW after configuring the settings on the web menu, setting items that are not available by the DIP switch are decided by the web menu settings.
- To access the web menu, Internet Explorer 6.0 (or later version) for Windows is required.

## 1 Connect this unit and your PC using the LAN cable.

Since this unit automatically detects the type of a LAN cable (straight or crossover), you can use a straight LAN cable to directly connect this unit to a PC.

## 2 Turn on this unit and your PC.

## 3 Change the IP address of your PC as follows.

IP address: 192.168.100.2  
Subnet mask: 255.255.255.0

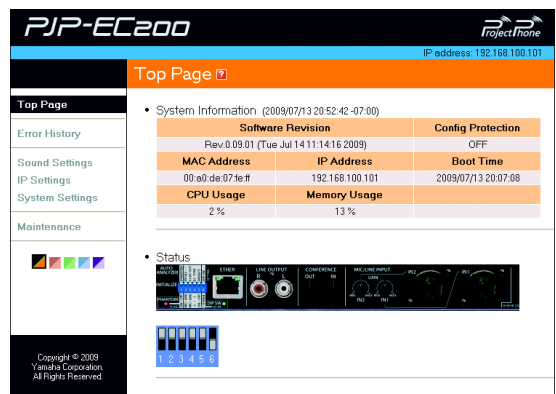

You can use an IP address within the range of "192.168.100.1" to "192.168.100.254" (except "192.168.100.101"). In this procedure, "192.168.100.2" is used as an example.

## 4 On your PC, run the web browser and then select "Open" from the "File" menu.

## 5 Enter "http://192.168.100.101" and then click "OK".

The web menu is displayed.

# Setting the Password

No password is set to this unit by default. For security reasons, we suggest that you set a password to this unit. By setting a password, you can prevent third parties from access to this unit and changing the configurations.

## 1 Click "System Settings".

The "System Settings" screen appears.

## 2 In the "Login Password" field, click "Edit".

The screenshot shows the 'System Settings' screen for the PJP-EC200. The 'Login Password' section is expanded, showing a 'Password' field with the value 'Not set' and an 'Edit' button. Other sections like 'Clock', 'HTTP Server', and 'Audio Guidance' are also visible.

The "Login Password Settings" screen appears.

## 3 Enter a new password (up to 32 one-byte alpha-numerals).

The screenshot shows the 'Login Password Settings' screen. The 'Password' section is highlighted, showing 'New Password' and 'New Password (to confirm)' fields with 'Apply' and 'Cancel' buttons.

New Password: Enter a desired password.

New Password (to confirm): Reenter the password for confirmation.

If a password has already been set, enter the current password in the "Old Password" field.

## 4 Click "Apply".

The new password is set and then the confirmation screen appears.

## 5 Click "Close".

The screenshot shows the 'Login Password Settings' screen with a message 'Configured settings successfully.' and a 'Close' button.

The "Connect to 192.168.100.101" screen appears.

## 6 Enter "pjp-ec200" in the "User name" field and the password you have set in step 3 in the "Password" field and then click "OK".

The screenshot shows the 'Connect to 192.168.100.101' screen. The 'User name' field is set to 'pjp-ec200' and the 'Password' field is filled with dots. The 'Remember my password' checkbox is unchecked. 'OK' and 'Cancel' buttons are at the bottom.

The "System Settings" screen appears again.

# Setting the Date and Time

Follow the procedure below to set the date and time of this unit.

## 1 Click "System Settings".

The "System Settings" screen appears.

## 2 In the "Clock" field, click "Edit".

PJP-EC200 Date/Time	Timezone	NTP Server
2009/07/13 04:57:56	+00:00	Not set

Access Permission	Display Name
Any	

Guidance	Volume
Enable	Middle

The "Clock Settings" screen appears.

## 4 In the "Timezone" field, select the time zone of your area.

**PJP-EC200 Date/Time**

☐ Change  
2009 / 7 / 17 YYYY/MM/DD  
4 : 54 : 12 HH:MM:SS  
☒ Don't change

☒ Don't use NTP

Apply Cancel

To set the exact time, enter a time a little ahead and then click "Apply" according to a time signal.

## If your area uses DST (Daylight Saving Time)

Select "Adjust clock for daylight saving changes" and then configure the DST setting.

**Adjust automatically:** Adjust DST automatically according to the time zone.

### Note

To adjust DST automatically, this unit must be connected to the Internet.

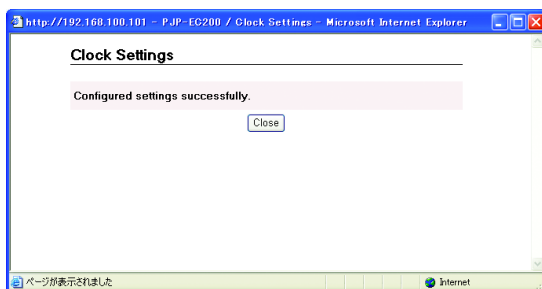

**Specify by date and time:** Specify the period of DST in month, day and time.

**Specify by day of the week:** Specify the period of DST in month, week number, day of the week and time.

## 5 Click "Apply".

The confirmation screen appears.

## 6 Click "Close".

The "System Settings" screen appears again.

## Setting the date and time automatically

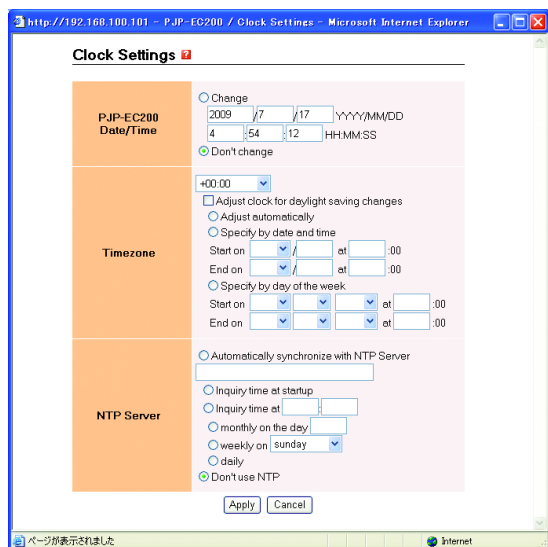

You can set the date and time of this unit automatically by using an NTP server via the Internet.

### Notes

- To use an NTP server, this unit must be connected to the Internet.
- You may not be able to use an NTP server due to the security settings of your LAN. In this case, you need to change the settings of your router to connect to an external NTP server. For details, refer to the owner's manual supplied with your router.

## 1 In the "Timezone" field, select the time zone of your area.

## 2 In the "NTP Server" field, select "Automatically synchronize with NTP server" and then enter an NTP server address.

---

### **3 Select when to connect to the NTP server for clock synchronization.**

Inquiry time at startup: Synchronize the clock at startup of this unit.

Inquiry time at: Synchronize the clock at a specified time.

If you select "Inquiry time at", select a day to synchronize the clock.

- monthly on the day: Synchronize the clock monthly on the specified day.
- weekly on: Synchronize the clock weekly on the specified day of the week.
- daily: Synchronize the clock daily.

---

### **4 Click "Apply".**

The confirmation screen appears.

---

### **5 Click "Close".**

The "System Settings" screen appears again.

# Configuring the Network Settings

## 1. Specifying an IP address of this unit's LAN port

According to the LAN environment where this unit is used, configure the IP address netmask settings of this unit.

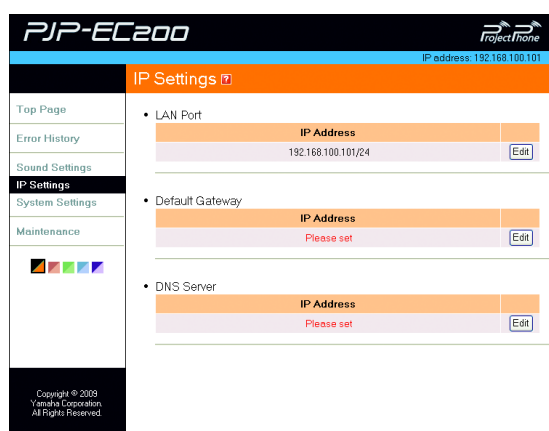

"192.168.100.101/24" is assigned to the LAN port by default. If you want to change the IP address, use an IP address which is not used by other external devices in the same network.

### 1 Click "IP Settings".

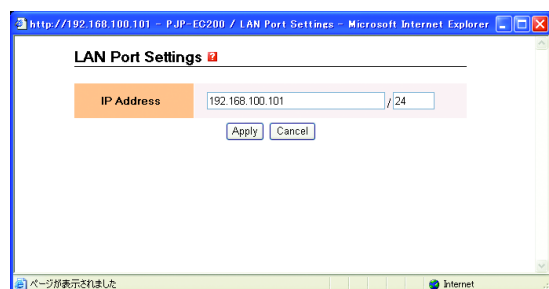

The "IP Settings" screen appears.

### 2 In the "LAN Port" field, click "Edit".

The "LAN Port Settings" screen appears.

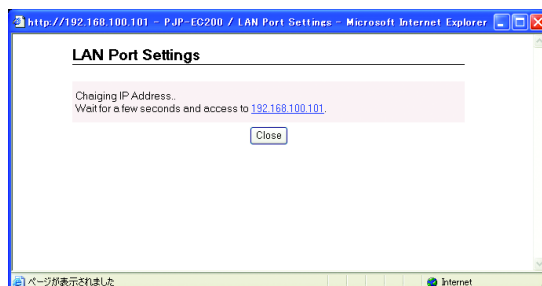

### 3 Enter an IP address to assign to this unit.

### 4 Click "Apply".

The confirmation screen appears.

### 5 Click on the link to access to the new IP address and then click "Close".

The "Top Page" screen under the new IP address appears.

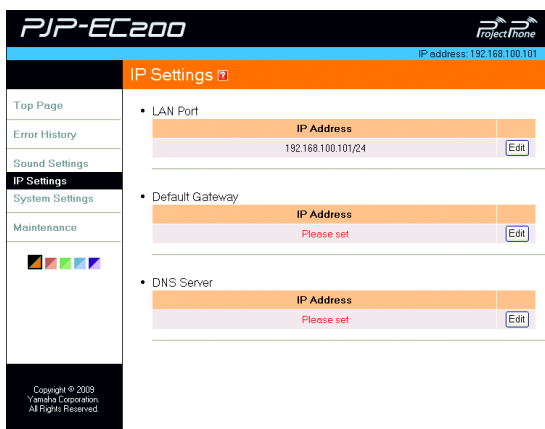

## 2. Specifying a default gateway

Follow the procedure below to specify a default gateway for this unit.

### 1 Click "IP Settings".

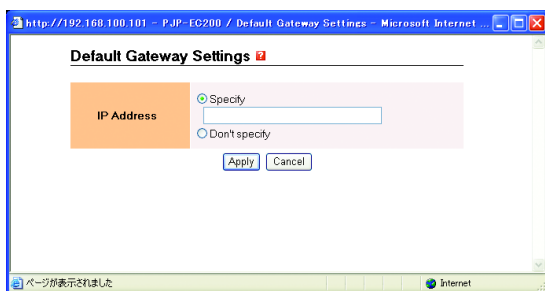

The "IP Settings" screen appears.

### 2 In the "Default Gateway" field, click "Edit".

The "Default Gateway Settings" screen appears.

### 3 Select "Specify" and then enter the IP address of the default gateway in the "IP Address" field.

### 4 Click "Apply".

The confirmation screen appears.

### 5 Click "Close".

The "IP Settings" screen appears again.

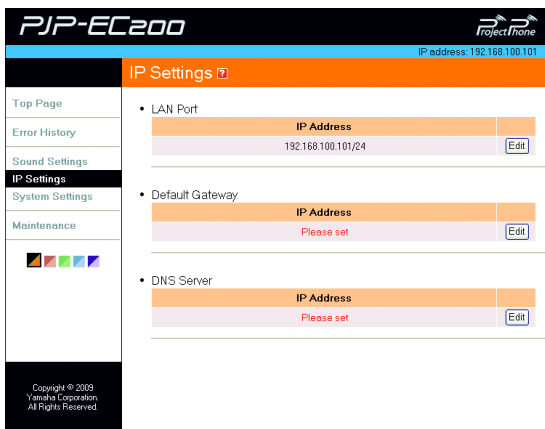

### 3. Specifying a DNS server

Follow the procedure below to specify a DNS server for this unit.

#### 1 Click "IP Settings".

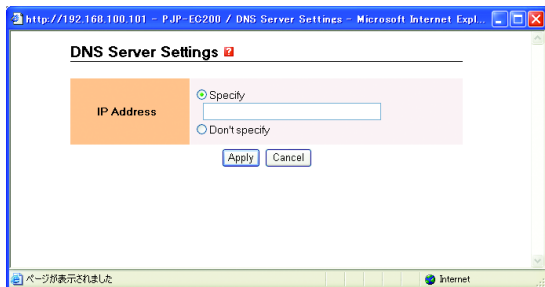

The "IP Settings" screen appears.

#### 2 In the "DNS Server" field, click "Edit".

The "DNS Server Settings" screen appears.

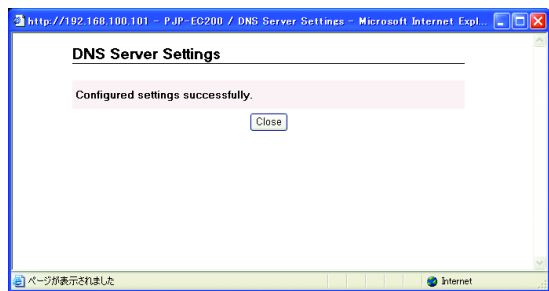

#### 3 Select "Specify" and then enter the IP address of the DNS server in the "IP Address" field.

#### 4 Click "Apply".

The confirmation screen appears.

#### 5 Click "Close".

The "IP Settings" screen appears again.

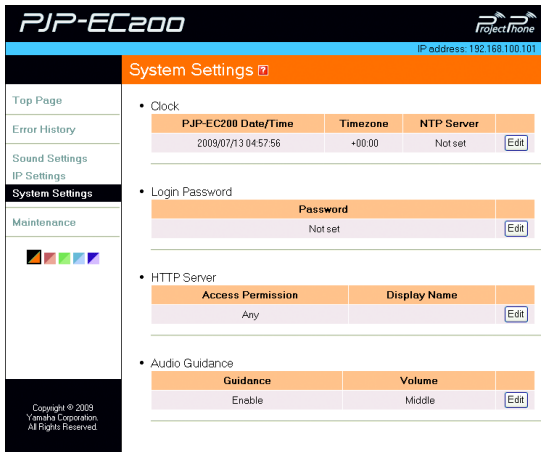

# Limiting Access to the Web Menu

You can limit access to the web menu by PC's IP address or permit access to the web menu only from PCs in the same network.

## 1 Click "System Settings".

The "System Settings" screen appears.

## 2 In the "HTTP Server" field, click "Edit".

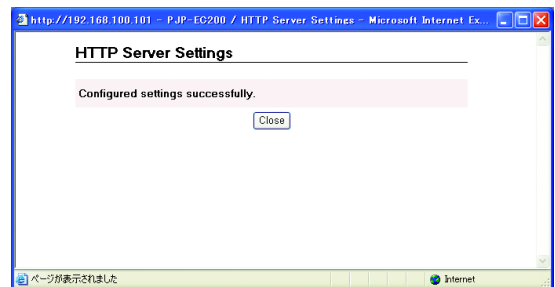

The "HTTP Server Settings" screen appears.

## 4 Click "Apply".

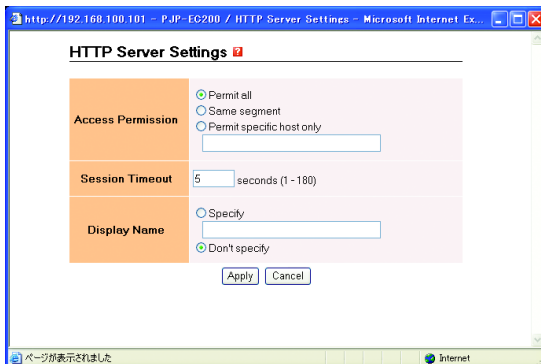

The confirmation screen appears.

## 5 Click "Close".

The "System Settings" screen appears again.

## 3 Configure the access limitation settings.

**Access Permission:** Select an access condition from "Permit all" (allow access from any address), "Same segment" (allow access within the same network), and "Permit specific host only" (allow access from the specified IP address only).

**Session Timeout:** Specify a timeout period. You will be logged out from the web menu if the specified time passes after the last operation.

**Display Name:** Specify a name assigned to this unit. To specify a name, select "Specify" and then enter a desired name (up to 64 one-byte alpha-numerals).

# Controlling Echoes

Follow the procedure below to configure the echo reduction level according to your environment. You can configure the settings for MIC/LINE IN1 and IN2 individually.

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Echo Canceller" field, click "Edit".

	Use	Level	Mic/Sp Distance	Mic Type	
MIC/LINE IN1	Enable	3	0(m)	Fixed Mic	Edit
MIC/LINE IN2	Enable	3	0(m)	Fixed Mic	

	Use	Level	Band width	
MIC/LINE IN1	Enable	-12dB	1/93oct	Edit
MIC/LINE IN2	Enable	-12dB	1/93oct	

	Use	Level	
MIC/LINE IN1	Enable	17dB	Edit
MIC/LINE IN2	Enable	17dB	
CONFERENCE IN	Enable	17dB	

	Output to LINE OUT	
MIC/LINE IN1	Disable	Edit
MIC/LINE IN2	Disable	

The "Echo Canceller Settings" screen appears.

## 3 Configure the echo canceller settings.

MIC/LINE IN1

Use: ☒ Enable ☐ Disable

Level: 3

Mic/Sp Distance (0-40m): 0 delay = 0(ms)

Mic Type: ☐ Hand Mic ☒ Fixed Mic

MIC/LINE IN2

Use: ☒ Enable ☐ Disable

Level: 3

Mic/Sp Distance (0-40m): 0 delay = 0(ms)

Mic Type: ☐ Hand Mic ☒ Fixed Mic

Apply Cancel

**Use:** Select whether to use the echo canceller. To use the echo canceller, select "Enable".

**Level:** Select an echo reduction level. The higher the level, the higher the echo reduction. The lower the level, the lower the echo reduction but higher the audio quality of simultaneous two-way communications.

**Mic/Sp Distance:** Specify the distance (0 to 40 m) between the microphone and speaker. If you are using multiple microphones and speakers, specify the distance between nearest pair.

**Mic Type:** Select the type of the connected microphone. If the distance between the microphone and speaker is variable, select "Hand Mic". If the distance is fixed, select "Fixed Mic".

## 4 Click "Apply".

The confirmation screen appears.

## 5 Click "Close".

Echo Canceller Settings

Configured settings successfully.

Close

The "Sound Settings" screen appears again.

# Controlling Acoustic Feedback

Follow the procedure below to configure the acoustic feedback reduction level according to your environment. You can configure the settings for MIC/LINE IN1 and IN2 individually.

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Feedback Suppressor" field, click "Edit".

**Sound Settings**

• Echo Canceller

	Use	Level	Mic/Sp Distance	Mic Type	
MIC/LINE IN1	Enable	Low	0(m)	Fixed Mic	Edit
MIC/LINE IN2	Enable	Low	0(m)	Fixed Mic	

• Feedback Suppressor

	Use	Level	Band width	
MIC/LINE IN1	Enable	-12dB	1/93oct	Edit
MIC/LINE IN2	Enable	-12dB	1/93oct	

• Noise Reduction

	Use	Level	
MIC/LINE IN1	Enable	17dB	Edit
MIC/LINE IN2	Enable	17dB	
CONFERENCE IN	Enable	17dB	

• Mixer

	Output to LINE OUT	
MIC/LINE IN1	Disable	Edit
MIC/LINE IN2	Disable	

The "Feedback Suppressor Settings" screen appears.

## 3 Configure the feedback suppressor settings.

**Feedback Suppressor Settings**

MIC/LINE IN1

Use	<input checked="" type="radio"/> Enable <input type="radio"/> Disable
Level	-12dB
Band width	1/93oct

MIC/LINE IN2

Use	<input checked="" type="radio"/> Enable <input type="radio"/> Disable
Level	-12dB
Band width	1/93oct

Apply Cancel

**Use:** Select whether to use the feedback suppressor.

To use the feedback suppressor, select "Enable".

**Level:** Select a cutoff amount of the notch filter applied to acoustic feedback frequencies from "-6dB", "-12 dB" and "-18dB". If acoustic feedback is rarely generated, select "-6dB". If acoustic feedback is frequently generated, select "-18dB".

**Band width:** Select a cutoff bandwidth of the notch filter applied to acoustic feedback frequencies from "1/10oct", "1/60oct" and "1/93oct". If acoustic feedback is frequently generated, select "1/10oct".

## 4 Click "Apply".

The confirmation screen appears.

## 5 Click "Close".

**Feedback Suppressor Settings**

Configured settings successfully.

Close

The "Sound Settings" screen appears again.

# Controlling Noises

Follow the procedure below to configure the noise reduction level according to your environment. You can configure the settings for MIC/LINE IN1 and IN2 individually.

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Noise Reduction" field, click "Edit".

The screenshot shows the 'Sound Settings' interface for the PJP-EC200. It includes sections for Echo Cancellation, Feedback Suppressor, Noise Reduction, and Mixer. The 'Noise Reduction' section is expanded, showing settings for MIC/LINE IN1, MIC/LINE IN2, and CONFERENCE IN. Each has a 'Use' checkbox (checked), a 'Level' dropdown (set to 17dB), and an 'Edit' button.

	Use	Level	Mic/Sp Distance	Mic Type	
MIC/LINE IN1	Enable	Low	0(m)	Fixed Mic	Edit
MIC/LINE IN2	Enable	Low	0(m)	Fixed Mic	Edit

	Use	Level	Band width	
MIC/LINE IN1	Enable	-12dB	1/3oct	Edit
MIC/LINE IN2	Enable	-12dB	1/3oct	Edit

	Use	Level	
MIC/LINE IN1	Enable	17dB	Edit
MIC/LINE IN2	Enable	17dB	
CONFERENCE IN	Enable	17dB	

	Output to LINE OUT	
MIC/LINE IN1	Disable	Edit
MIC/LINE IN2	Disable	

The "Noise Reduction Settings" screen appears.

## 4 Click "Apply".

The confirmation screen appears.

## 5 Click "Close".

The screenshot shows a confirmation dialog titled 'Noise Reduction Settings' with the message 'Configured settings successfully.' and a 'Close' button.

The "Sound Settings" screen appears again.

## 3 Configure the noise reduction settings.

The screenshot shows the 'Noise Reduction Settings' screen with settings for MIC/LINE IN1, MIC/LINE IN2, and CONFERENCE IN. Each section has a 'Use' checkbox (checked) and a 'Level' dropdown (set to 17dB). There are 'Apply' and 'Cancel' buttons at the bottom.

	Use	Level
MIC/LINE IN1	Enable	17dB
MIC/LINE IN2	Enable	17dB
CONFERENCE IN	Enable	17dB

**Use:** Select whether to use the noise reduction. To use the noise reduction, select "Enable".

**Level:** Select a noise reduction level from "6dB", "12dB" and "17dB". If your environment is noiseless, select "6dB". If your environment is noisy, select "17dB".

# Adjusting the Input Gain Automatically (Auto Gain Controller)

If you are using a boundary microphone, the volume level of sounds picked up by the microphone varies depending on the distance between the microphone and talker. By configuring the auto gain controller settings, this unit automatically optimizes the pickup gain according to the volume level of pickup sounds. You can configure the settings for MIC/LINE IN1 and IN2 individually.

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Auto Gain Controller" field, click "Edit".

Auto Gain Controller	
MIC/LINE IN1	MIC/LINE IN2
Use	Disable
Level	6dB

Gain

MIC/LINE IN1	MIC/LINE IN2
-∞	-∞

Level

MIC/LINE IN1	MIC/LINE IN2	CONFERENCE IN

Operation
Auto Analyzer

The "Auto Gain Controller Settings" screen appears.

## 4 Click "Apply".

The confirmation screen appears.

## 5 Click "Close".

Auto Gain Controller Settings

Configured settings successfully.

Close

The "Sound Settings" screen appears again.

## 3 Configure the auto gain controller settings.

Auto Gain Controller Settings

MIC/LINE IN1

Use: ☒ Enable ☐ Disable

Level: 6dB

MIC/LINE IN2

Use: ☒ Enable ☐ Disable

Level: 6dB

Apply Cancel

**Use:** Select whether to use the auto gain controller. To use the auto gain controller, select "Enable".

**Level:** Select an auto gain control level from "6dB", "10dB" and "20dB". To widen the sound pickup area, select "20dB". To narrow the sound pick area, select "6dB".

# Adjusting the Input Gain for MIC/LINE INPUT

If the volume level of sounds picked up by the microphone is too high, the sounds cannot be handled by this unit and will be distorted. In this case, you need to adjust the input gain so that the INPUT LEVEL LED does not turn on in red. You can configure the settings for MIC/LINE IN1 and IN2 individually.

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Gain" field, click "Edit".

The screenshot shows the 'Sound Settings' screen with the following sections:

- Auto Gain Controller**

	Use	Level	
MIC/LINE IN1	Disable	6dB	Edit
MIC/LINE IN2	Disable	6dB	
- Gain**

MIC/LINE IN1	MIC/LINE IN2	
-∞	-∞	Edit

The "Gain Settings" screen appears.

## 3 Configure the input gain settings.

The screenshot shows the 'Gain Settings' screen with two sliders for MIC/LINE IN1 and MIC/LINE IN2. Each slider has a 'MAX' and 'MIN' label at the ends. The current level is indicated by a white bar. The screen also includes 'Close', 'Save', and 'Hardware Adjust' buttons.

**MIC/LINE**: Select "MIC" or "LINE" depending on the device connected to MIC/LINE INPUT.

**Slider bar**: Adjust the input gain for MIC/LINE INPUT.

**Save**: Save the gain settings to this unit's built-in flash memory.

**Hardware Adjust**: Adjust to the GAIN settings on the main unit. The MIC/LINE input level is also adjusted.

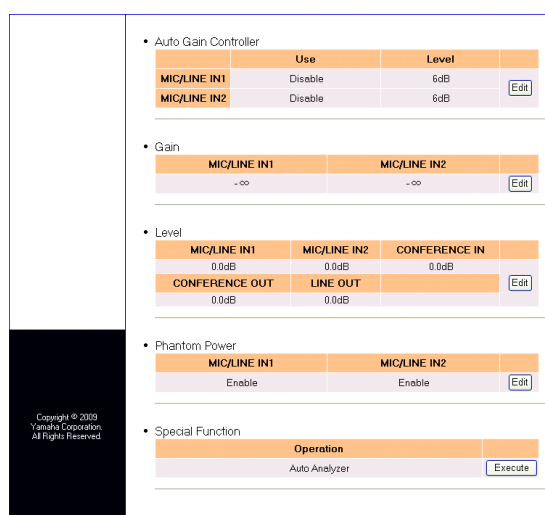

# Adjusting the Volume Level

Follow the procedure below to adjust the volume levels of the microphone and speakers connected to this unit.

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Level" field, click "Edit".

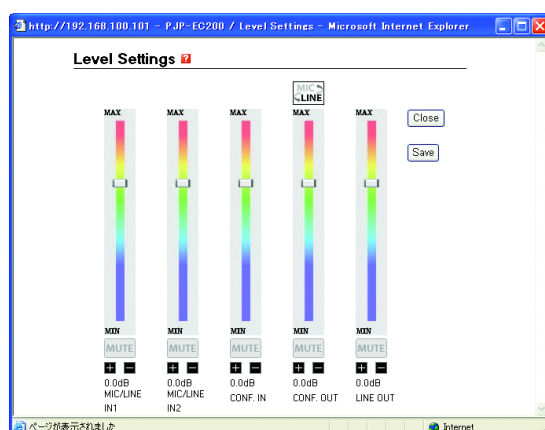

The screenshot shows the 'Sound Settings' screen with the 'Level' section highlighted. The 'Level' section contains a table with columns for MIC/LINE IN1, MIC/LINE IN2, CONFERENCE IN, CONFERENCE OUT, and LINE OUT. The current levels are all set to 0.0dB. An 'Edit' button is visible next to the table.

MIC/LINE IN1	MIC/LINE IN2	CONFERENCE IN	CONFERENCE OUT	LINE OUT
0.0dB	0.0dB	0.0dB	0.0dB	0.0dB

The "Level Settings" screen appears.

## 3 Configure the volume level of each device.

The screenshot shows the 'Level Settings' screen with five vertical sliders for adjusting volume levels. Each slider has a 'MAX' label at the top and a 'MIN' label at the bottom. Below each slider is a 'MUTE' button. The sliders are labeled MIC/LINE IN1, MIC/LINE IN2, CONF IN, CONF OUT, and LINE OUT. The current levels are all set to 0.0dB. A 'Close' button and a 'Save' button are visible on the right side of the screen.

**MIC/LINE**: Select "MIC" or "LINE" depending on the device connected to CONFERENCE OUT.

**Slider bar**: Adjust the volume level.

**MUTE**: Temporarily turn off (mute) the microphone or speakers. To cancel the mute function, click "MUTE" again.

**Save**: Save the volume settings to this unit's built-in flash memory.

# Using the Internal Mixer

You can select whether to output audio input through MIC/LINE to LINE OUTPUT. You can configure the settings for MIC/LINE IN1 and IN2 individually.

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Mixer" field, click "Edit".

The "Mixer Settings" screen appears.

**PJP-EC200** ProjectPhone

MIC/LINE IN2  
Output to LINE OUT: ☐ Enable ☒ Disable

[Apply] [Cancel]

**Output to LINE OUT:** Select whether to output audio input through MIC/LINE to LINE OUTPUT. To output audio, select "Enable".

## 4 Click "Apply".

The confirmation screen appears.

# Configuring the Phantom Power Settings

If the DIP switch (PHANTOM) is set to ON, you can select whether to supply the phantom power thorough MIC/LUNE IN1 and IN2.

Do not turn on the phantom power when a device which does not require a phantom power is connected to MIC/ LINE INPUT. Incorrect settings may cause a malfunction of the external devices. For your safety, the phantom power is not supplied unless it is enabled on the web menu even if the DIP switch (PHANTOM) is set to ON.

## Note

Use the DIP switch (PHANTOM) to turn on the phantom power only when a condenser microphone which requires an external power supply is connected.

While the phantom power is turned on, DC+48V power is supplied through pins 2 and 3 of the XLR jack (MIC/ LINE INPUT).

## 1 Click "Sound Settings".

The "Sound Settings" screen appears.

## 2 In the "Phantom Power" field, click "Edit".

Operation	
Auto Analyzer	Execute

The "Auto Analyzer" screen appears.

## 3 Click "Auto Analyzer Start".

For information about the operations during the auto analyzer process, refer to “Automatic Setup by Auto Analyzer” (page 15).

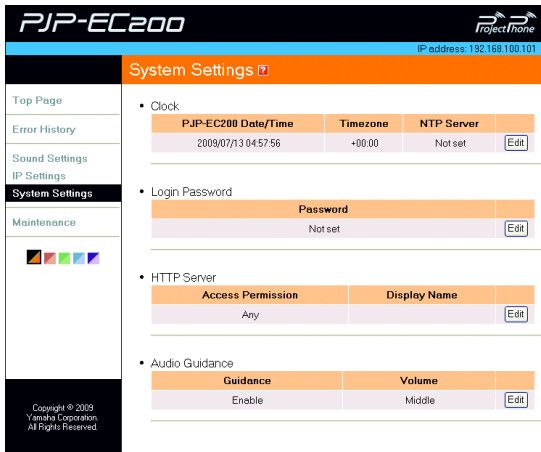

# Turning On/Off the Audio Guidance

Follow the procedure below to turn on/off the audio guidance which notifies you of events during the auto analyzer process. Also, you can set the volume level of the audio guidance.

## 1 Click "System Settings".

The "System Settings" screen appears.

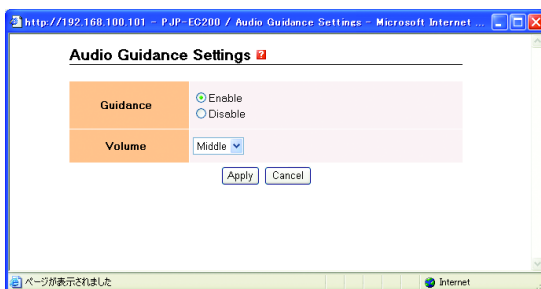

## 2 In the "Audio Guidance" field, click "Edit".

The screenshot shows the 'System Settings' screen for the PJP-EC200. The 'Audio Guidance' section is highlighted, showing 'Guidance' set to 'Enable' and 'Volume' set to 'Middle'. An 'Edit' button is visible next to the 'Audio Guidance' section.

The "Audio Guidance Settings" screen appears.

## 3 Configure the audio guidance settings.

The screenshot shows the 'Audio Guidance Settings' screen. The 'Guidance' field is set to 'Enable' and the 'Volume' field is set to 'Middle'. 'Apply' and 'Cancel' buttons are visible at the bottom.

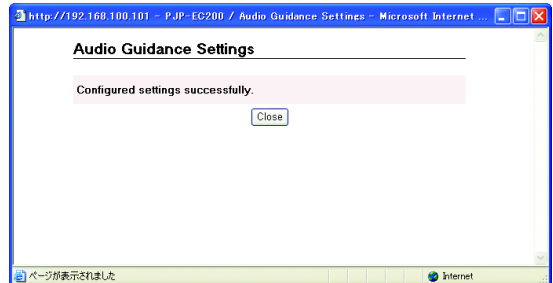

**Guidance:** Select whether to use the audio guidance. To use the audio guidance, select "Enable".

**Volume:** Select a volume level of the audio guidance.

## 4 Click "Apply".

The confirmation screen appears.

## 5 Click "Close".

The screenshot shows the 'Audio Guidance Settings' confirmation screen. It displays the message 'Configured settings successfully.' and a 'Close' button.

The "System Settings" screen appears again.

# Maintenance and Management

You can use various maintenance and management features of this unit with the web menu.

## Checking configurations and status

You can output a report that shows the configurations and status of this unit as a text file.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [Make Report] - [Output Reports to File] field, click "Execute".

**PJP-EC200** IP address: 192.168.100.101

**Maintenance**

- Make Reports
  - Operation**
    - Output Reports to File
- Configuration Management
  - Operation**
    - Output Configuration to Window
    - Output Configuration to File
    - Save/Load Configuration
- SYSLOG Management
  - Host Address**
    - Not set
  - DEBUG** OFF **INFO** ON **NOTICE** ON
  - Flash-Memory Save Interval** OFF
  - Operation**
    - Output SYSLOG to Window
    - Output SYSLOG to File
    - Save SYSLOG
    - Delete SYSLOG

The "Output Reports to File" screen appears.

### 3 Right-click "Report File" and then select "Save Target As".

**Output Reports to File**

To output Reports File as Text Format:  
Right-click the link below and select "Save Target As...".

[Report File](#)

### 4 Specify where to save the file and then click "Save".

The report file is saved.

## Checking the configuration information

This unit internally manages configuration information with a config file.

### ■ Viewing the configuration information

Follow the procedure below to display the current configurations on the PC monitor.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [Configuration Management] - [Output Configuration to Window] field, click "Execute".

**PJP-EC200** IP address: 192.168.100.101

**Maintenance**

- Make Reports
  - Operation**
    - Output Reports to File
- Configuration Management
  - Operation**
    - Output Configuration to Window
    - Output Configuration to File
    - Save/Load Configuration
- SYSLOG Management
  - Host Address**
    - Not set
  - DEBUG** OFF **INFO** ON **NOTICE** ON
  - Flash-Memory Save Interval** OFF
  - Operation**
    - Output SYSLOG to Window
    - Output SYSLOG to File
    - Save SYSLOG
    - Delete SYSLOG

The current configurations are displayed.

## ■Saving the configuration information on your PC

Follow the procedure below to save the current configurations as a text file.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [Configuration Management] - [Output Configuration to File] field, click "Execute".

The screenshot shows the 'Maintenance' screen of the PJP-EC200. The left sidebar contains links: Top Page, Error History, Sound Settings, IP Settings, System Settings, and Maintenance (selected). The main content area has three sections: 'Make Reports' with 'Output Reports to File' (Execute); 'Configuration Management' with 'Output Configuration to Window' (Execute), 'Output Configuration to File' (Execute), and 'Save/Load Configuration' (Execute); and 'SYSLOG Management' with various settings and 'Output SYSLOG' options (Execute).

The "Output Configuration to File" screen appears.

### 3 Right-click "Configuration File" and then select "Save Target As".

The dialog box titled 'Output Configuration to File' contains the text: 'To output Configuration to File as Text Format: Right-click the link below and select "Save Target As...".' Below this text is a link labeled 'Configuration File' and a 'Close' button.

### 4 Specify where to save the file and then click "Save".

The config file is saved.

## ■Saving the configuration information on this unit

Follow the procedure below to save the current configurations on this unit. You can save up to three sets of configurations.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [Configuration Management] - [Save/Load Configuration] field, click "Execute".

The screenshot shows the 'Maintenance' screen of the PJP-EC200. The left sidebar is the same as the previous screenshot. The main content area shows the 'Configuration Management' section with 'Save/Load Configuration' (Execute) highlighted.

The "Save/Load Configuration" screen appears.

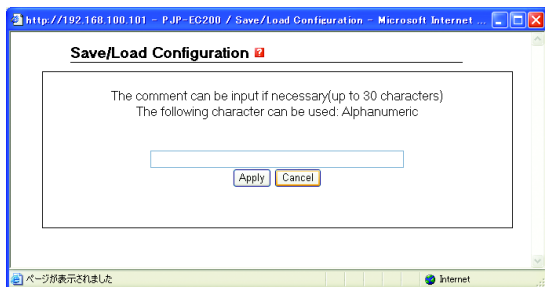

### 3 Click "Save" next to the desired memory number.

The 'Save/Load Configuration' screen displays a table with three rows for memory slots 1, 2, and 3. Each row has 'Save' and 'Load' buttons. A 'Cancel' button is at the bottom. The status bar at the bottom shows a message: 'ページでエラーが発生しました。' (An error occurred on the page).

The comment input screen appears.

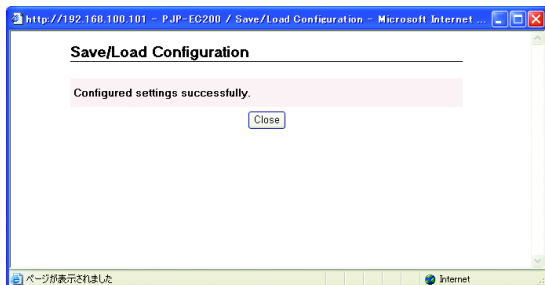

#### 4 Enter a comment and then click "Apply".

You can input a comment if necessary. The comment will be displayed under "Save Time" in the "Save/Load Configuration" screen.

The confirmation screen appears.

#### 5 Click "Close".

The "Maintenance" screen appears again.

### ■ Recalling configurations saved on this unit

#### 1 In the "Save/Load Configuration" screen, click "Load" next to the desired memory number.

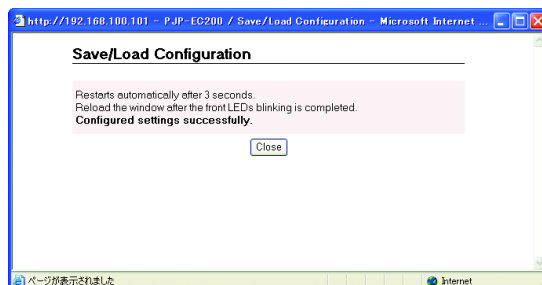

The confirmation screen appears.

#### 2 Click "OK".

The result confirmation screen appears.

#### 3 Click "Close".

This unit restarts.

## Checking the system logs

This unit records the operation history as system logs (SYSLOG).

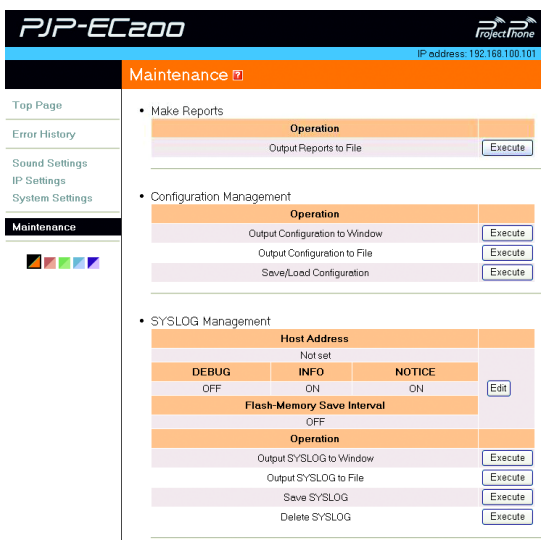

### ■Configuring the log settings

Follow the procedure below to change the contents of logs to be output or specify where to save log files.

#### 1 In the web menu, click "Maintenance".

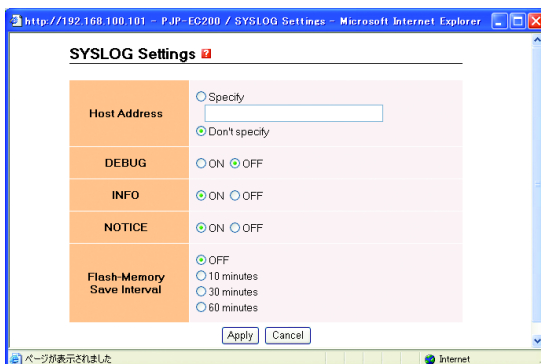

The "Maintenance" screen appears.

#### 2 In the [SYSLOG Management] field, click "Edit".

The "SYSLOG Settings" screen appears.

#### 3 Configure the log settings.

**Host Address:** Specify where to save log files. Select "Specify" and then enter a destination IP address.

**DEBUG:** Select whether to output information about the internal processing of this unit.

**INFO:** Select whether to output information about the system status of this unit.

**NOTICE:** Select whether to output notifications and warning information.

**Flash-Memory Save Interval:** Select an interval to automatically save logs to this unit's built-in flash memory.

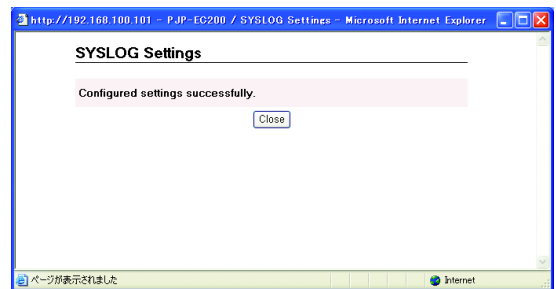

#### Note

If you turn off this unit before logs are saved to this unit's built-in flash memory, the unsaved logs will be cleared.

#### 4 Click "Apply".

The confirmation screen appears.

#### 5 Click "Close".

The "Maintenance" screen appears again.

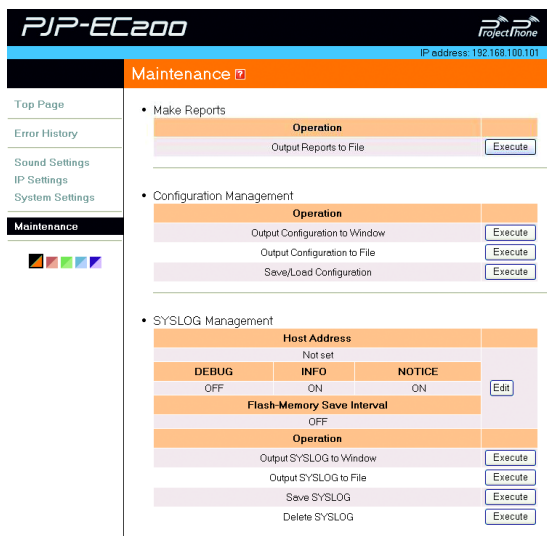

## ■ Viewing the system logs

Follow the procedure below to display the system logs (up to 500 lines) on the PC monitor.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [SYSLOG Management] - [Output SYSLOG to Window] field, click "Execute".

The system logs are displayed.

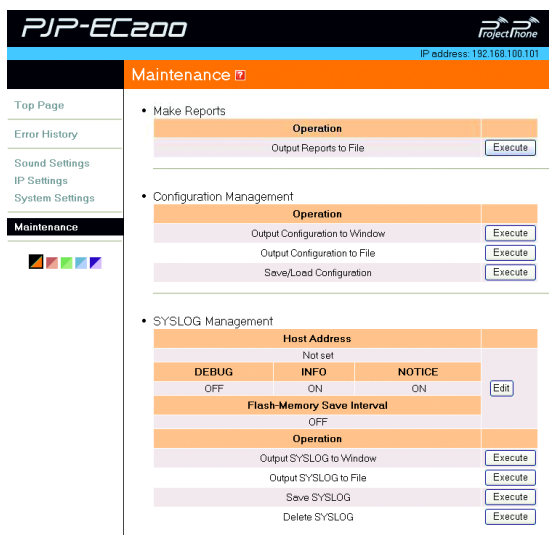

## ■ Saving the system logs on your PC

Follow the procedure below to save the current system logs as a text file.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [SYSLOG Management] - [Output SYSLOG to File] field, click "Execute".

The "Output SYSLOG to File" screen appears.

### 3 Right-click "SYSLOG File" and then select "Save Target As".

### 4 Specify where to save the file and then click "Save".

The SYSLOG file is saved.

## ■ Saving the system logs on this unit

Follow the procedure below to save the current system logs to this unit's built-in flash memory.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [SYSLOG Management] - [Save SYSLOG] field, click "Execute".

**PJP-EC200** IP address: 192.168.100.101

**Maintenance**

- Make Reports
 

Operation	
Output Reports to File	Execute
- Configuration Management

Flash-Memory Save Interval	
OFF	
Operation	
Output SYSLOG to Window	Execute
Output SYSLOG to File	Execute
Save SYSLOG	Execute
Delete SYSLOG	Execute

The "Save SYSLOG" screen appears.

### 3 Click "Save".

**Save SYSLOG**

Attention:

- This operation might worsen temporarily deprave the voice processing performance.

Click 'Save' to write SYSLOG into Flash-Memory.

Save Cancel

The confirmation screen appears.

### 4 Click "Close".

**Saving SYSLOG**

Saved SYSLOG.

Close

The "Maintenance" screen appears again.

## ■Deleting the system logs

Follow the procedure below to delete the current system logs.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [SYSLOG Management] - [Delete SYSLOG] field, click "Execute".

**PJP-EC200** IP address: 192.168.100.101

**Maintenance**

- Make Reports
 

Operation	
Output Reports to File	Execute
- Configuration Management
 

Operation	
Output Configuration to Window	Execute
Output Configuration to File	Execute

Output SYSLOG to Window	Execute
Output SYSLOG to File	Execute
Save SYSLOG	Execute
Delete SYSLOG	Execute

The "Delete SYSLOG" screen appears.

### 3 Click "Delete".

**Delete SYSLOG**

Are you sure to delete all SYSLOG?

Delete Cancel

The confirmation screen appears.

### 4 Click "Close".

**Delete SYSLOG**

Deleted all SYSLOG.

Close

The "Maintenance" screen appears again.

## Checking the error history

You can check the history of errors occurred on this unit. This may bring an early solution to system problems.

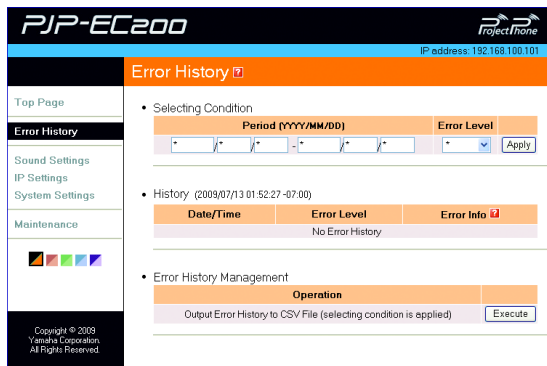

### ■ Viewing the error history

Follow the procedure below to display the error history (up to 1500 events) on the PC monitor.

#### 1 In the web menu, click "Error History".

The "Error History" screen appears.

#### 2 In the [Selecting Condition] field, specify the conditions (period and error level) to filter the error history to be output and then click "Apply".

**Period (YYYY/MM/DD):** Specify a period to filter the error history.

**Error Level:** Specify an error level to filter the error history. Select "Level 1" for minor errors (error in operation, etc.), "Level 2" for temporary errors (operation error, etc.) and "Level 3" for permanent errors (misconfiguration, malfunction, etc.).

#### 3 In the [History] field, check the error list.

### ■ Saving the error history on your PC

Follow the procedure below to save the error history as a CVS file.

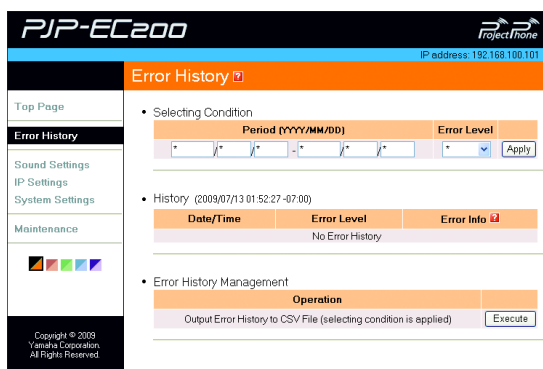

You can save the error history which you can view by carrying out "Viewing the error history".

#### 1 In the web menu, click "Error History".

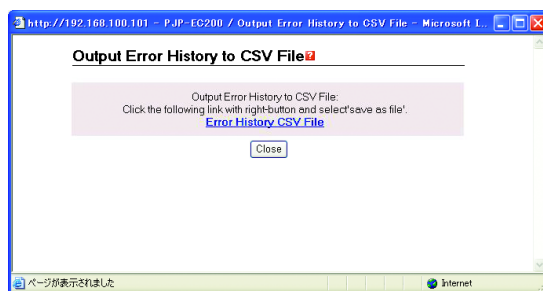

The "Error History" screen appears.

#### 2 In the [Error History Management] - [Output Error History to CSV File (selecting condition is applied)] field, click "Execute".

The "Output Error History to CSV File" screen appears.

#### 3 Right-click "Error History CSV File" and then select "Save Target As".

#### 4 Specify where to save the file and then click "Save".

The CSV file is saved.

## ■Saving the error history on this unit

Follow the procedure below to save the error history to this unit's built-in flash memory.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [Error History Management] - [Save Error History] field, click "Execute".

Copyright © 2009  
Yamaha Corporation  
All Rights Reserved.

The "Save Error History" screen appears.

### 3 Click "Save".

Copyright © 2009  
Yamaha Corporation  
All Rights Reserved.

The confirmation screen appears.

### 4 Click "Close".

Copyright © 2009  
Yamaha Corporation  
All Rights Reserved.

The "Maintenance" screen appears again.

## ■Saving the error history automatically

You can set the interval to automatically save the error history to this unit's built-in flash memory.

### Note

The error history that has not been saved to the flash memory will be cleared if this unit is turned off.

### 1 In the web menu, click "Maintenance".

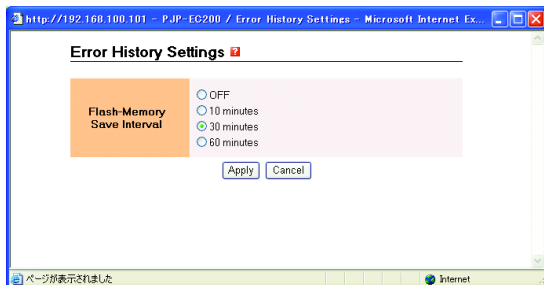

The "Maintenance" screen appears.

### 2 In the [Error History Management] - [Flash-Memory Save Interval] field, click "Edit".

Copyright © 2009  
Yamaha Corporation  
All Rights Reserved.

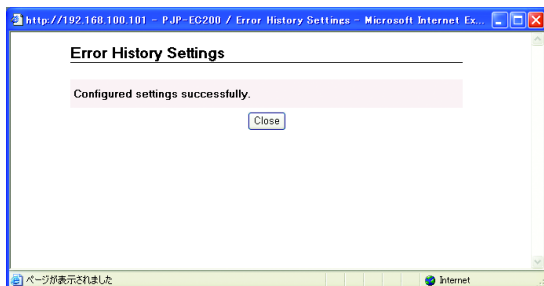

The "Error History Settings" screen appears.

### 3 Select an interval to automatically save the error history and then click "Apply".

The confirmation screen appears.

### 4 Click "Close".

The "Maintenance" screen appears again.

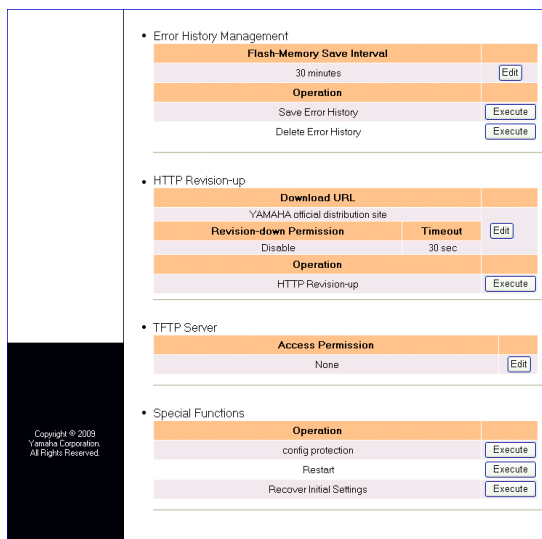

## ■Deleting the error history

Follow the procedure below to delete the current error history.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [Error History Management] - [Delete Error History] field, click "Execute".

The "Delete Error History" screen appears.

### 3 Click "Delete".

The confirmation screen appears.

### 4 Click "Close".

The "Maintenance" screen appears again.

# Special Functions

## Protecting the settings

You can protect the settings of this unit.

- 1 In the web menu, click "Maintenance".  
The "Maintenance" screen appears.
- 2 In the [Special Functions] - [Config Protection] field, click "Execute".

The screenshot shows the 'config protection' web interface. It has a sidebar on the left with a copyright notice: 'Copyright © 2009 Yamaha Corporation. All Rights Reserved.' The main content area is divided into several sections:

- Error History Management**

Flash-Memory Save Interval	
30 minutes	<input type="button" value="Edit"/>
Operation	
Save Error History	<input type="button" value="Execute"/>
Delete Error History	<input type="button" value="Execute"/>
- HTTP Revision-up**

Download URL	
YAMAHA official distribution site	
Revision-down Permission	
Disable	<input type="button" value="Edit"/>
Timeout	
30 sec	
Operation	
HTTP Revision-up	<input type="button" value="Execute"/>
- TFTP Server**

Access Permission	
None	<input type="button" value="Edit"/>
- Special Functions**

Operation	
config protection	<input type="button" value="Execute"/>
Restart	<input type="button" value="Execute"/>
Recover Initial Settings	<input type="button" value="Execute"/>

The "Config Protection" screen appears.

- 3 Click "Protect Set".

The screenshot shows the 'config protection' web interface with a confirmation message:

Attention:  
When the security function of the setting is made effective.  
The protection of the setting is invalid now.  
Is the setting effectively protected?

Below the message are two buttons:  and .

The confirmation screen appears.

- 4 Click "Close".

The screenshot shows the 'config protection' web interface with a success message:

Configured settings successfully.

Below the message is a button: .

The protection is enabled and the "Maintenance" screen appears again.

## To disable the protection

- 1 In the [Special Functions] - [Config Protection] field, click "Execute".  
The "Config Protection" screen appears.

- 2 Click "Protect Release".

The confirmation screen appears.

- 3 Click "Close".

The protection is disabled and the "Maintenance" screen appears again.

## Restarting this unit

You can forcibly quit all the operations in process and restart this unit.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [Special Functions] - [Restart] field, click "Execute".

Copyright © 2009  
Yamaha Corporation  
All Rights Reserved.

- Error History Management

Flash-Memory Save Interval	
30 minutes	<a href="#">Edit</a>
Operation	
Save Error History	<a href="#">Execute</a>
Delete Error History	<a href="#">Execute</a>
- HTTP Revision-up

Download URL	
YAMAHA official distribution site

Restart	<a href="#">Execute</a>
Recover Initial Settings	<a href="#">Execute</a>

The "Restart" screen appears.

### 3 Click "Apply".

Restart

Attention:

- Configurations which is currently under modification will not be saved.

Are you sure to restart?

[Apply](#) [Cancel](#)

The confirmation screen appears.

### 4 Click "Close".

Restart

Restarts automatically after 3 seconds.  
Reload the window after the front LEDs blinking is completed.

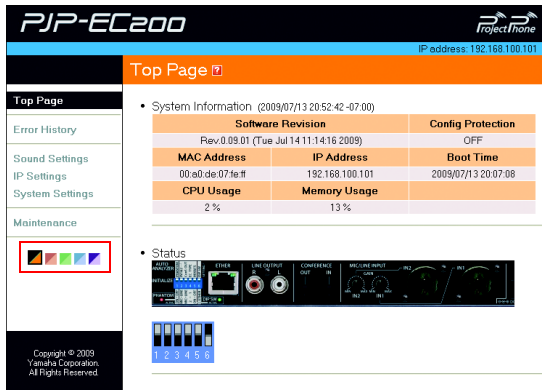

[Close](#)

The unit restarts.

# Changing the Screen Color

You can change the screen color of the web menu.

- 1 In the web menu, click a desired color chip.

The screen color changes.

# Using the Latest Features

You can download the firmware (program to control the functions of this unit) to use the latest features. There are two ways to update the firmware of this unit: One way is that you connect this unit to the Internet and automatically install the latest firmware (page 47). The other way is that you download the firmware to a PC and install it manually (page 49).

## Flow of Firmware Update

To update the firmware, this unit must be connected to the network.

### 1 Connect this unit to the network.

Use a LAN cable to connect the LAN port of this unit and the network. Before connecting a LAN cable, be sure to turn off this unit.

### 2 Configure the network settings of this unit.

For details, refer to “Configuring the Network Settings” (page 21).

### 3 Start updating the firmware.

For details, refer to “Updating the firmware automatically” (page 47) or “Updating the firmware manually” (page 49).

## Updating the firmware automatically

### Notes

- To update the firmware automatically, you need to configure the DNS server setting. For details, refer to “3. Specifying a DNS server” (page 23).
- Automatic firmware update is available only when this unit is connected to the Internet. If not, follow the procedure in “Updating the firmware manually” (page 49).
- Do not perform any other operation during the firmware update. If the update operation is interrupted, this unit may malfunction. In that case you need to return this unit to the factory for repairs.
- When the firmware update is complete, this unit restarts automatically. The calls being connected are disconnected at this time.
- Do not disconnect the LAN cable during the firmware update. Otherwise, this unit may malfunction. In that case you need to return this unit to the factory for repairs.
- The firmware update may delete the logs saved in this unit's flash memory. We recommend you save the important log data as a file.
- The firmware update resets the echo reduction level configured in the web menu to the default. Reconfigure the level after completing the update. For details, refer to “Controlling Echoes” (page 25).

You can also specify the URL from which the firmware is downloaded (page 48).

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [HTTP Revision-up] field, click "Execute".

Copyright © 2009 Yamaha Corporation. All Rights Reserved.

The "Confirmation of software licensing agreement" screen appears.

### 3 Read the contents of license agreement carefully and then click "agree and execute".

The firmware update starts.

## The firmware update process takes a few minutes

During the firmware update process, the LEDs turn on in rotation. Never turn off this unit while the LEDs are turned on.

## When the firmware update is complete

This unit restarts automatically. Confirm that the version number has been updated in the "Software Revision" field in the "Top Page" screen of the web menu.

## Configuring the HTTP revision-up settings

Follow the procedure below to configure the HTTP revision-up settings.

### 1 In the web menu, click "Maintenance".

The "Maintenance" screen appears.

### 2 In the [HTTP Revision-up] field, click "Edit".

Copyright © 2009  
Yamaha Corporation.  
All Rights Reserved.

Error History Management	
Flash-Memory Save Interval	
30 minutes	[Edit]
Operation	
Save Error History	[Execute]
Delete Error History	[Execute]
HTTP Revision-up	
Download URL	
YAMAHA official distribution site	
Revision-down Permission	Timeout
Disable	30 sec
Operation	
HTTP Revision-up	
[Execute]	
TFTP Server	
Access Permission	
None	[Edit]
Special Functions	
Operation	
config protection	[Execute]
Restart	[Execute]
Recover Initial Settings	[Execute]

The "HTTP Revision Up Settings" screen appears.

### 3 Configure the automatic firmware update settings.

HTTP Revision Up Settings

Service	<input checked="" type="radio"/> Enable <input type="radio"/> Disable
Download URL	<input checked="" type="radio"/> YAMAHA official distribution site <input type="radio"/> others <input type="text" value="http://"/>
Revision Down Permission	<input type="radio"/> Enable <input checked="" type="radio"/> Disable
Timeout Time	30 sec (1-180, Default: 30)

[Apply] [Cancel]

**Service:** Select whether to use the HTTP revision-up.

To use the HTTP revision-up, select "Enable".

**Download URL:** Select a firmware download website. To specify a URL from which the firmware is downloaded, select "others" and then enter a URL.

**Revision Down Permission:** Select whether to permit revision-down (reverting to an older version of firmware). To permit revision-down, select "Enable".

**Timeout Time:** Specify a timeout period for HTTP revision-up.

## Updating the firmware manually

If you cannot connect this unit to the Internet directly, you need to download the latest firmware to your PC, and then install it using TFTP.

### 1 Confirm the current version number.

Check the version number displayed in the "Software Revision" field in the "Top Page" screen of the web menu.

### 2 Download the latest firmware to your PC.

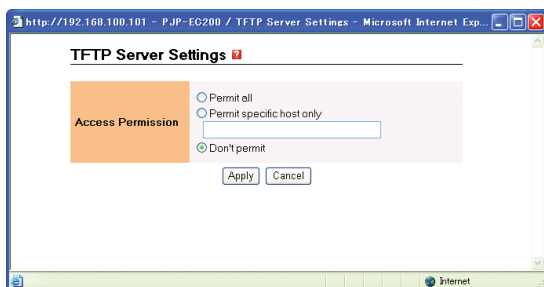

Access the following website and download the latest firmware.

Projectphone website:

<http://www.yamaha.co.jp/english/product/projectphone/>

### 3 Permit access to the TFTP server.

Select "Maintenance" in the web menu, click "Edit" in the "TFTP Server" field and then change the setting in the "TFTP Server Settings" screen.

**Permit all:** Allow access from any address.

**Permit specific host only:** Allow access from the specified IP address only. Enter an IP address of a PC.

### 4 Transfer the firmware to this unit.

#### Notes

- Do not perform any other operation during the firmware update. If the update operation is interrupted, this unit may malfunction. In that case you need to return this unit to the factory for repairs.
- When the firmware update is complete, this unit restarts automatically. The calls being connected are disconnected at this time.
- Do not disconnect the LAN cable during the firmware update. Otherwise, this unit may malfunction. In that case you need to return this unit to the factory for repairs.
- The firmware update resets the echo reduction level configured in the web menu to the default. Reconfigure the level after completing the update. For details, refer to "Controlling Echoes" (page 25).

Follow the procedure below.

#### ■ Start "Command Prompt" on a PC which can access the TFTP server of this unit

When using Windows XP, click the "Start" menu and then select [All Program] - [Accessories] - [Command Prompt].

#### ■ Enter and run the following command

`tftp -i [IP address of this unit] put [file name]`

Example:

`tftp -i 192.168.100.101 put pjp_ec200.bin`

Firmware update starts.

#### The firmware update process takes a few minutes

During the firmware update process, the LEDs turn on in rotation. Never turn off this unit while the LEDs are turned on.

#### When the firmware update is complete

This unit restarts automatically. Confirm that the version number has been updated in the "Software Revision" field in the "Top Page" screen of the web menu.

# Troubleshooting

## ***Basic check***

- Is the POWER LED turned on?

If not, see page 51.

- Is the LINK LED above the LAN port turned on?

If not, see page 51.

## ***Checking the LED status***

If the LEDs turn on, there is a communication failure. See page 51.

## ***Solving problems***

Consult one of the following description pages according to the problem.

- “Q1: LEDs are off or blinking” (page 51)
- “Q2: Web menu settings are not available” (page 52)
- “Q3: Have an audio problem” (page 53)
- “Q4: Other problems” (page 54)

If the problem you are experiencing is not listed or if the instruction does not help, contact the nearest authorized Yamaha dealer or service center.

## Q1: LEDs are off or blinking

Problem	Cause	Remedy
<b>No LEDs turn on.</b>	This unit is not turned on.	Set the power switch to on.
	The power cable is not connected to the AC outlet.	Check that the power cable is connected to the AC outlet properly.
	The main or branch circuit breaker is shut off.	<ul style="list-style-type: none"> <li>• If the circuit breaker is tripped to off, set it to on.</li> <li>• If the circuit breaker is on, set it to off then on again.</li> </ul>
	There is a power failure.	Wait until the power supply is restored.
	Power is not supplied to the AC outlet. (Carry out the test by connecting another electrical appliance to the AC outlet.)	<ul style="list-style-type: none"> <li>• If another appliance can neither be turned on, have the power outlet or power wiring serviced.</li> <li>• If another appliance can be turned on, have this unit serviced.</li> </ul>
<b>The LINK LED above the LAN port does not turn on.</b>	The PC or hub is turned off.	Check that this unit and the devices connected to this unit are turned on. Even when the device is connected to the LAN port properly, the LINK LED does not turn on if the device is turned off.
	The connections are improper.	Disconnect the connections between this unit, PC and hub and then connect them firmly.
	The LAN (network) card installed on your PC is not working properly, or its communication mode is not compatible with this unit.	Check the installation of the LAN (network card) and communication mode.
<b>The INPUT LEVEL LEDs do not turn on.</b>	The phantom power setting is incorrect.	Set the DIP switch (PHANTOM) to ON when a microphone which requires a phantom power is connected.
	The input gain for MIC/LINE IN is too low.	Increase the input gain.
<b>The PHANTOM/VOLUME/DIP SW LEDs are blinking.</b>	The settings are not reflected to this unit.	<ul style="list-style-type: none"> <li>• If this unit is in the auto analyzer process, wait until the auto analyzer is complete.</li> <li>• If the settings of this unit are protected, disable the protection.</li> <li>• If you want to change the settings using the DIP switch, make the DIP switch settings prioritized.</li> </ul>
<b>All LEDs turn on.</b>	Immediately after the power has been turned on (normal behavior).	Wait for about three seconds.
	This unit is broken down.	Have this unit serviced.

## Q2: Web menu settings are not available

Problem	Cause	Remedy
<b>Cannot access the web menu.</b>	This unit does not recognize the PC. (The LINK LED above the LAN port does not turn on.)	Refer to "The LINK LED above the LAN port does not turn on." (page 51)
	The PC's network settings are incorrect (other PCs and printers on the LAN are not functioning).	<ul style="list-style-type: none"> <li>• Reconfigure the LAN board or LAN card settings and then reboot the PC.</li> <li>• Reset the IP address of the PC.</li> </ul>
	This unit is malfunctioning.	Initialize this unit and then reconfigure the settings. (page 56)
	The network settings of this unit are incorrect.	<ul style="list-style-type: none"> <li>• If connecting to a PC through a LAN port, set the IP address of the LAN port.</li> <li>• Configure the default gateway setting according to your environment.</li> </ul>
	Access to the web menu is not authorized.	<p>If the IP address access limitation feature is enabled, the following message will be displayed when you try to connect from an unauthorized host:</p> <p>"Error503 This server is available to members only. I'm sorry, your host is not member."</p>
	The specified URL is invalid.	When using this unit for the first time or after initializing this unit, access "http://192.168.100.101/."
	The web browser is not configured to connect via LAN.	If you are using Windows Internet Explorer 6: the connection settings are found in the "Connection" tab under "Internet Options". If the connection method is set to dial-up, the browser will not be able to access the web menu. Change the connection setting to "Never dial a connection".
	The Web browser is using a proxy server.	If you are using Windows Internet Explorer 6: Select [Tools] - [Internet Options] - [Connection] tab - [LAN Settings] and then uncheck the "Use a proxy server for your LAN" box.
<b>Cannot access the web menu is inaccessible after entering a password.</b>	You cannot remember the IP address of this unit.	<ul style="list-style-type: none"> <li>• Press INITIALIZE when this unit is turned on to reset the network settings to the default.</li> <li>• Turn on this unit while holding down INITIALIZE to reset all settings of this unit to the default.</li> </ul>
	The password is incorrect. (The error message is displayed).	<ul style="list-style-type: none"> <li>• The password is case sensitive. Make sure that the case is correct for every letter.</li> <li>• A problem may arise if the browser stores incorrect authentication information (user name and password) and automatically uses it to access this unit. In this case, clear the authentication information currently stored and enter the correct user name and password.</li> </ul>
<b>Cannot change the settings from the web menu.</b>	The web menu settings are not prioritized.	Set the DIP switch (DIP SW) to ETHER. (page 10)
<b>Cannot save a password in the web browser for logging in to the web menu.</b>	The user box is blank on the "Network Password" screen.	Some web browsers require entering your user name to save the password. In this case, enter "pjp-ec200" as a username.
<b>A login prompt appears even though a password has not been set.</b>	A login prompt will appear even if no password has been set (normal behavior).	Enter "pjp-ec200" as a username while leaving the password blank and then click "OK".

### Q3: Have an audio problem

Problem	Cause	Remedy
<b>The audio from the PC or videoconference system cannot be heard or is distorted.</b>	The input level setting is incorrect.	Configure the input level setting on the device connected to this unit.
	The input level of CONFERENCE IN is too low.	Increase the input level. (page 30)
<b>The audio output to the PC or videoconference system cannot be heard or is distorted.</b>	The output level setting is incorrect.	Switch between MIC level and LINE level depending on the device connected to MIC/LINE INPUT. (pages 10 and 29)
	The output level of CONFERENCE OUT is too low.	Increase the output level. (page 30)
<b>This unit generates echoes.</b>	The echo canceller setting is improper.	Run the auto analyzer.
	The echo reduction level is too low.	Adjust the echo reduction level in the web menu.
	The volume level of the speakers is too high.	<ul style="list-style-type: none"> <li>• Turn the speaker volume level down.</li> <li>• Keep the speakers away from the microphone.</li> </ul>
	The input gain for MIC/LINE IN is extremely high.	Adjust the input gain so that the INPUT LEVEL LED does not turn on in red. (pages 9 and 29)
<b>This unit generates acoustic feedback noises.</b>	This unit is used in the environment where acoustic feedback is frequently generated.	<ul style="list-style-type: none"> <li>• Change the positions of the microphone and speakers.</li> <li>• Run the auto analyzer.</li> </ul>
	The feedback suppressor level is too low.	<ul style="list-style-type: none"> <li>• Adjust the echo reduction level in the web menu.</li> <li>• Configure the "Band width" setting in the web menu. (page 26)</li> </ul>
	The input gain for MIC/LINE IN is extremely high.	Adjust the input gain so that the INPUT LEVEL LED does not turn on in red. (pages 9 and 29)

## Q4: Other problems

Problem	Cause	Remedy
<b>Cannot synchronize the clock with an NTP server.</b>	The IP address or domain name of the NTP sever is incorrect.	<ul style="list-style-type: none"> <li>• Check that the settings match the NTP server information.</li> <li>• Ping the NTP server to confirm that it is functioning.</li> </ul>
	A route to connect with the specified NTP server has not been set.	Check the Internet service provider settings or route settings.
<b>An incorrect time is not displayed.</b>	The time zone setting is incorrect.	Set the time zone according to your area.
<b>The clock setting cannot be saved.</b>	The built-in battery (for clock memory) is run out.	<ul style="list-style-type: none"> <li>• Supply the power to this unit for about five hours to change the built-in battery.</li> <li>• Have this unit serviced.</li> </ul>
<b>The phantom power is not supplied.</b>	The phantom power setting is incorrect.	Enable the phantom power with the DIP switch or web menu (depending on the DIP switch setting). (pages 10 and 32)
<b>Cannot output your own voices from your speakers.</b>	The internal mixer is disabled.	Enable the internal mixer. (pages 10 and 31)
<b>The audio cannot be output.</b>	The mute function is turned on in the web menu.	Turn off the mute function. (page 30)
<b>Firmware update fails.</b>	Timeout happens because the timeout period for HTTP revision-up is too short.	Increase the timeout period in the web menu. (page 48)
	The download URL setting is incorrect.	Configure the download URL setting correctly.
	The DNS server setting is incorrect.	Configure the address of the DNS server correctly.
<b>Cannot update the firmware by TFTP.</b>	The access permission setting is incorrect.	Configure the access permission setting correctly. (page 49)

# List of Error Messages

Patterns of front LEDs						Error type
MIC/LINE IN1	IN2	CONFERENCE	PHANTOM	GAIN KNOB	DIP SW	
Blink green/red	Blink green, On red	Blink green	Off	Blink green	Blink green	Detects a problem during system startup.
Blink green/red	Blink green, On red	Blink green, On red	Off	Blink green	Blink green	Firmware update failed.

# Resetting the Settings of This Unit

## Resetting all settings

You can reset the web menu settings and settings internally saved in this unit to the default.

### Notes

Please note the followings when you reset the settings of this unit.

- This operation will disconnect all the calls being connected.
- This operation will restore the factory default values (if available).
- This operation will overwrite data stored in the nonvolatile memory.
- You cannot undo the reset operation.

### ■ Initializing using the web menu

---

**1 In the web menu, click "Maintenance" and then click "Execute" in the [Special Functions] - [Recover Initial Settings] field.**

---

**2 Click "Apply".**

The confirmation screen appears.

---

**3 Click "Close".**

The settings of this unit are reset to the default. Since the configurations you have made are all cleared, you need to reconfigure this unit.

### ■ Initializing using the button on the main unit

---

**1 Turn off this unit.**

You do not need to disconnect cables.

---

**2 While holding down INITIALIZE, turn on this unit.**

Since the button is located inside the small hole, use a ballpoint pen or similar object to press the button. The front LEDs blink several times.

---

**3 Release INITIALIZE.**

The settings of this unit are reset to the default. Since the configurations you have made are all cleared, you need to reconfigure this unit.

## Resetting the network settings

In case that you cannot access the web menu (setting an incorrect IP address, etc.), follow the procedure below to reset the network settings of this unit.

### Note

This operation will reset "LAN Port Settings", "Default Gateway Settings" and "DNS Server Settings".

---

**1 Turn on this unit.**

---

**2 After this unit is started, press INITIALIZE.**

Since the button is located inside the small hole, use a ballpoint pen or similar object to press the button. The front LEDs blink several times.

---

**3 Release INITIALIZE.**

The network settings (IP address, etc) of this unit are reset to the default.

## Support Information

In case you are in need of support, visit the following website or contact the nearest authorized Yamaha dealer or service center.

### ■ Checking log information and setting configurations

A Yamaha representative may ask for log (SYSLOG) or configuration (config) information in order to understand the situation. The problem may be easier to fix if you provide log and configuration information along with a description of your problem.

For details about how to view the log and configuration information, refer to “Maintenance and Management” (page 35).

# Specifications

## *General specifications*

**Dimensions (W x H x D):**

270 mm x 42.6 mm x 180 mm  
(10-5/8" x 1-3/4" x 7-1/8")

**Weight:**

850 g (1.9 lbs)

**Power supply:**

AC 100 to 240 V (50/60 Hz)

**Power consumption:**

6 W maximum

**Radio interference standard:**

VCCI Class A, KN22, KN24

**Operating environment:**

Ambient temperature: 0 to 40°C (32 to 104 °F)  
Ambient humidity: 15% to 80% (no condensation)

**Audio range:**

100 to 20,000 Hz

**Arrival time of the direct sound:**

120 ms maximum

**Echo cancelling time:**

400 ms maximum

**Echo canceling quantity:**

60 dB maximum

**Noise reduction:**

17 dB maximum

**Interfaces:**

LINE OUTPUT (L/R): Stereo RCA pin-jacks  
CONFERENCE (IN/OUT): Stereo mini jacks  
MIC/LINE INPUT: XLR/PHONE combo jacks  
2ch (48-V phantom power supply supported)

**Supplied accessories:**

[Japan model]

AC adapter x 1, Power cable x 1, CD-ROM x 1,  
Installation/Setup Manual x 1, Warranty x 1

[Korea model]

AC adapter x 1, Power cable x 1, CD-ROM x 1,  
Installation/Setup Manual x 2

[Other models]

AC adapter x 1, Power cable x 1, CD-ROM x 1,  
Installation/Setup Manual x 1

## Input specifications

Terminal	Specification	Input level		Input impedance
		Rated input level	Maximum input level	
MIC/LINE INPUT (IN1/IN2)	XLR, balanced type IN1&2 (MIC)	-60 dB $\mu$ to -20 dB $\mu$	-6 dB $\mu$	3 k $\Omega$
	XLR, balanced type IN1&2 (LINE)	-30 dB $\mu$ to +10 dB $\mu$	+20 dB $\mu$	50 to 600 $\Omega$ Mics/Lines
	TS PHONE, unbalance type IN1&2 (MIC)	-60 dB $\mu$ to -20 dB $\mu$	-6 dB $\mu$	2.4 k $\Omega$
	TS PHONE, unbalance type IN 1&2 (LINE)	-30 dB $\mu$ to +10 dB $\mu$	+20 dB $\mu$	
CONFERENCE IN	Mini jack, unbalance type	-7.8 dB $\mu$	0 dB $\mu$	15 k $\Omega$

The XLR jacks are compatible with phantom power (+48 V)

0 dB $\mu$  = 0.775 Vrms, 0dBV = 1 Vrms

## Output specifications

Terminal	Specification	Output level		Output impedance
		Rated output level	Maximum output level	
MAIN OUT	RCA pin jack, unbalance type	-10 dBV	-3 dBV	600 $\Omega$
CONFERENCE OUT	Mini jack, unbalance type CONF.OUT (LINE)	-10 dBV	-3 dBV	600 $\Omega$
	Mini jack, unbalance type CONF.OUT (MIC)	-30 dBV	-23 dBV	600 $\Omega$

0 dB $\mu$  = 0.775 Vrms, 0dBV = 1 Vrms
