

AirPlay 2

Firmware Update

Your music, as the artist intended, with simple voice control from Siri on your iOS device. Discover AirPlay 2 on MusicCast:

Apple Music in Every Room

Enjoy the convenience of playing your favorite songs and playlists from Apple Music in any room of your house. Link AirPlay 2-enabled devices with each other, or send different music from different devices to different rooms.

Hey Siri

Control your music without lifting a finger. Take advantage of Siri voice control to start and stop music, link and unlink rooms and send music to any room using a simple voice command for each.

It Just Works

Have multiple Apple devices in your home? Good. AirPlay 2 can be utilized with any iPhone, iPad or HomePod running iOS 11 or later. Playback, streaming and custom configurations can be controlled on your lock screen, play menu or home settings.
