

# Actions on Google

## Firmware Update

Now we're talking pure entertainment! What could make a home with a MusicCast wireless multi-room audio system even better? More voice control options so you can control that system simply by speaking!

Now that the entire MusicCast family of products works with the Google Home™ family of products, you can control the audio throughout your home with Actions on Google, which are voice commands that tell Google Assistant™ what you want it to do. In other words, to turn on the lights, all you have to do is say, "Ok, Google, turn on my lights in the living room."

---

### Ok, Google

To get your Google Assistant's attention, say "Ok, Google" or "Hey, Google." Once Google Assistant is listening, you can start telling it what you want it to do by saying Actions. For example, to turn on the MusicCast BAR 400 in the living room, say, "Ok Google, ask MusicCast to turn on the living room."

### What do I need to use Actions on Google with MusicCast?

- Any MusicCast product
- Any Google Home product, Android™ or iOS device with Google Home App
- Yamaha MusicCast app

### Get Started

To get started, just download the [Setup Guide](#) and learn how to set up your apps. See a complete list of MusicCast Actions on Google [here](#). Introduce Google Assistant to your MusicCast products, and you won't have to lift a finger to enjoy wireless multi-room audio in every room of your home.
