

Yamaha Group Environmental Policy

The Yamaha Group engages in business activities committed to reducing environmental impacts across our entire value chain. We comply with relevant environmental laws, regulations, and other requirements, continuously improving our environmental management system. Moreover, we actively undertake the following initiatives in our endeavor to preserve the global environment and biodiversity.

1. Addressing to Climate Change

We will reduce greenhouse gas emissions by improving energy efficiency and expanding the use of renewable energy.

2. Sustainable Use of Wood

We strive for sustainable procurement and utilization of wood, continuously fostering and conserving wood species that are of sustainability concern.

3. Resource Conservation, Waste and Hazardous Substance Reduction

In all our business activities, including product life cycles, we strive to reduce waste, promote resource circulation, and conserve resources. Also, we manage, reduce, and substitute hazardous substances appropriately.

4. Water Resource Conservation

We strive to conserve water resources by making efficient use of water, reusing it, and preventing pollution.

We disclose our environmental policy both inside and outside the company.
